### **NATURE OF THE CASE**

On February 11, 2016, this Court declared that the State had failed to cure the inequities that it had previously affirmed to exist and that caused the school finance system in Kansas to be unconstitutional. *Gannon v. State*, 2016 Kan. LEXIS 8, \*107-108 (Kan. Feb. 11, 2016) ("Gannon II"). As a result, this Court found that it was appropriate to give the State "another, albeit shortened, opportunity to develop a constitutional funding system" and gave the Legislature "a second, and substantial" chance to comply with *Gannon I. Id.*, at \*107-108, 111-112 ("[T]he State would help its case by showing its work in how it determined that any other proposed solution complies with *Gannon I.*"). Ultimately, in response, the State adopted Senate Substitute for House Bill 2655 ("H.B. 2655"). *See e.g.*, Order, dated April 8, 2016. However, the State cannot meet its express burden to demonstrate that H.B. 2655 complies with *Gannon I* and therefore, Kansas' schools remain unconstitutionally funded.

#### STATEMENT OF THE ISSUES

- (1) The State cannot meet its express burden to demonstrate that H.B. 2655 complies with the directives set forth in *Gannon I* and *Gannon II*.
- (2) Given the State's failure to cure the inequities affirmed by this Court, this Court has the equitable power to remedy the unconstitutionalities in various ways.

### STATEMENT OF THE FACTS

### A. Explanation of the Equalization Mechanisms as They Operated in 2014-15

Prior to *Gannon II*, the State adopted Senate Bill 7 (also referred to as S.B. 7, the Classroom Learning Assuring Student Success Act, or "CLASS"). CLASS revoked the

<sup>&</sup>lt;sup>1</sup> As used herein, Gannon I refers to this Court's decision in Gannon v. State, 298 Kan. 1107, 1157 (2014).

previous school funding system (the School District Finance and Quality Performance Act or "SDFQPA") and replaced it with blocks of funding referred to as "block grants." The State's recent enactment of H.B. 2655 did not change the structure of CLASS or the funding levels. The education funding in Kansas is still distributed to school districts in the form of block grants. H.B. 2655 only affected the calculation of the two equity components at issue in this appeal: the capital outlay equalization aid and supplemental general state aid. It also added a new component referred to as school district equalization state aid or "hold harmless" aid.

In both *Gannon I* and *Gannon II*, this Court offered the State a "safe harbor": if the State funded the two equalization mechanisms as they operated in 2014-15 under then-existing statutes, the State would be in compliance with the requirements of Article 6 of the Kansas Constitution. Those methods are important for comparative purposes because the Court has already determined that distribution method and level of funding complied with the Constitution's equity requirement. To fully understand the changes imposed by H.B. 2655, it is important to first understand how the two equalization mechanisms operated under the "safe harbor."

The two equalization mechanisms are very different from each other, but incorporate a similar concept: using the appropriate formula, a district is assigned a "state aid rate." That state aid rate is then used to determine the amount of equalization aid that will be distributed to the district. While each formula embraces the concept of the state aid rate, the rate is calculated very differently under the formulas used to calculate capital outlay state aid or supplemental general state aid. The formula for calculating supplemental general state aid under the statute that existed in 2014-15 is much more generous to the property-poor districts than the then-

existing formula for calculating capital outlay state aid. It does a better job of equalizing the naturally-occurring variations in district wealth.

### 1. Operation of Capital Outlay State Aid Under K.S.A. 2013 Supp. 72-8814

Under operation of K.S.A. 2013 Supp. 72-8814, capital outlay state aid is calculated as follows:

- 1. First, each district's Assessed Valuation Per Pupil (AVPP) for the previous year is rounded to the nearest \$1,000.
  - 2. Then, using the rounded AVPP, the median AVPP is obtained.
  - 3. Any school district at the median AVPP is assigned a 25% state aid rate.
- 4. The state aid rate for districts *above* the median is calculated by *decreasing* the 25% state aid rate by 1% for each \$1,000 the district's AVPP is over the median AVPP.
- 5. The state aid rate for districts *below* the median is calculated by *increasing* the 25% state aid rate by 1% (not to exceed 100%) for each \$1,000 the district's AVPP is below the median AVPP.
- 6. The amount of capital outlay aid levied by the district is then multiplied by the district's state aid rate. The district is entitled to that amount of capital outlay state aid.
  - 2. Operation of Supplemental General State Aid Under K.S.A. 72-6405 et seq.

Under operation of K.S.A. 72-6405 *et seq.*, supplemental general state aid is calculated as follows:

1. Districts are first ranked high to low based on the previous year's Assessed Valuation Per Pupil (AVPP).

- 2. The district at the 81.2 percentile is identified. That district's AVPP is used for purposes of determining the state aid rate.
- 3. Each district's AVPP is divided by the AVPP of the district at the 81.2 percentile. The result is used to determine the state aid rate as follows:
  - a. If the result is greater than or equal to 1.0, the district is not entitled to any supplemental general state aid.
  - b. If the result is less than 1.0, the result is subtracted from 1.0. That is the district's state aid rate.
- 4. The state aid rate is multiplied by the Local Option Budget. The product is the amount of supplemental general state aid to which the district is entitled.

# B. Explanation of the Funding of Kansas Schools Under Operation of CLASS, as amended by H.B. 2655

H.B. 2655 was passed by both legislative chambers on March 24, 2016 and was then sent to the governor. *See*, *e.g.*, Order, dated April 8, 2016, at p. 4. Governor Brownback signed the bill on April 7, 2016. *Id.* H.B. 2655 changes the way that the equalization mechanisms operate under CLASS. However, with few exceptions, after receiving the hold harmless aid, each school district will get exactly the same total amount of funding as it did the year before. In what can only be described as a "shell game," the bill does the following:

1. First, the bill purports to comply with the February Order by actually providing capital outlay state aid pursuant to K.S.A. 2013 Supp. 72-8814. This results in an *increase* in capital outlay equalization for almost every district entitled to capital outlay state aid. *See* Appendix A: Memo. from Dennis, dated 3/22/16 (containing SF 16-133), pp. ECB003-08, at

- Col. 1. Further, this complies with the Court's "safe harbor" regarding the provision of capital outlay state aid.
- 2. In adopting H.B. 2655, the Legislature did **not** provide supplemental general state aid pursuant to K.S.A. 72-6405 *et seq*. Instead, it requires that, going forward, supplemental general state aid will be calculated using the less generous method for calculating capital outlay state aid, as set forth in K.S.A. 2013 Supp. 72-8814. *Compare* H.B. 2655, at Sec. 3 *with* K.S.A. 2013 Supp. 72-8814.<sup>2</sup> For the vast majority of school districts that receive supplemental general state aid, this will substantially *decrease* the amount of equalization aid to which the district is entitled. *See* Appx. A, pp. ECB003-08, at Col. 2. This decrease is significant and in almost every circumstance largely dwarfs any increase to capital outlay equalization. *Id.* at Col. 3.
- 3. H.B. 2655 then calculates the total amount of money that each district *lost* in supplemental general state aid and subtracts the amount that was *gained* in capital outlay state aid. The difference will be distributed to the districts as "school district equalization state aid" or "hold harmless" aid. *See* H.B. 2655, at Sec. 5. Generally speaking, a district will have a large amount of its supplemental general state aid taken away and will then be given that same money back as an increase to capital outlay state aid and/or as hold harmless aid (or "school district equalization state aid"). *See* H.B. 2655, at Sec. 5. In essence, then, the Legislature simply re-named the aid. Thus, the result for most school districts is the exact same amount of money that the district was expecting to receive under the block grants; *i.e.*, equal to an amount

<sup>&</sup>lt;sup>2</sup> A copy of the text of H.B. 2655 was filed as Appendix A to the State's Notice of Legislative Cure.

of equalization funding this Court found unconstitutionally inequitable in its February 2016 Opinion. *Compare id.* at Col. 3 *with id.* at Col. 4.

H.B. 2655 has been described by one legislator as "rearranging the deck chairs on the Titanic." This elaborate shell game is graphically demonstrated in Appendix N: Rearranging the Legos. Reminiscent of the adoption of CLASS, no district receives any "increased funding" from the year before under this new legislation. And, the "hold harmless" aid does not actually hold districts "harmless." It holds districts to the amount of money that they were already entitled to receive under the block grants, which the Kansas Supreme Court has already said was unconstitutional. But, more importantly, there is no attempt by the State to even the playing field among the districts, made uneven by the differences in district wealth. Quite simply, the State did not comply with the Court's order to adopt a remedy that provides equitable funding to Kansas school districts. In fact, in operation, the new legislation will only increase the distance between the property-poor districts and the property-wealthy districts, as demonstrated below.

### C. Explanation of H.B. 2655's Changes to Extraordinary Needs Fund

H.B. 2655 is revenue-neutral. The State will not be adding any additional funds into the system as a result of this bill. While 23 districts out of 286 districts appear to receive additional aid, *see generally* Appx. A, that money has been deducted from the "extraordinary needs fund" that was established in CLASS. There is no actual increase in funding provided under H.B. 2655. Rather, H.B. 2655 reduced the "extraordinary needs fund" from the \$17,521,425 that

<sup>3</sup> See Appendix B to State's Notice of Legislative Cure, at 729.

<sup>&</sup>lt;sup>4</sup> As explained below, there are 23 anomalous districts that appear to receive "additional" money. However, they are actually receiving distributions from the emergency needs fund.

would have been provided in that fund under CLASS to \$15,167,962. *See* H.B. 2655, \$1(d). This \$2,353,463 amount is then distributed to the 23 school districts that will receive small amounts of additional funding under the operation of the new formula. The reduction in the "extraordinary needs fund" allows the State to make these payments without increasing spending. As Senator Masterson described it, the decrease was "needed inside the formula to fully fund a hold harmless equalization provision." *See* Appendix B to State's Notice of Legislative Cure ("State's Appx. B"), at 275 (lines 9-14). In reality, it was needed to ensure that the Legislature was not required to increase any funding in the school finance bill through the operation of H.B. 2655.

H.B. 2655 also gives the Kansas State Board of Education (instead of the previously criticized state finance council overseen by the Governor) control of the remaining \$15,167,962 left in the "extraordinary needs fund" to respond to districts' emergency needs. *See* H.B. 2655, Sec. 9.

# D. <u>Effect of Applying the Capital Outlay Method of Equalization to the Supplemental General State Aid</u>

The practical effect of applying the capital outlay method of equalization for calculating supplemental general state aid is graphically demonstrated in Plaintiffs' chart demonstrating the loss in LOB equalization due to the change in methods, attached hereto as Plaintiffs' Appendix B. This chart, and its underlying documentation, demonstrates that implementing the capital outlay method of equalization to calculate supplemental general state aid effectively *increased* the disparity between the property-wealthy districts and the property-poor districts. While calculating supplemental general state aid pursuant to K.S.A. 72-6405 *et seq.* would have equalized districts to the 81.2 percentile, H.B. 2655 only equalizes to the 68.8 percentile. *See* 

Appx. B. This chart also demonstrates the reduction in terms of the educational opportunity (*i.e.*, dollars available to be spent per pupil) available to each district under H.B. 2655. *Id.* To control for variances in the statewide mill levy, the chart in Appendix B assumes a 20 mill LOB levy. Plaintiffs used this assumption because the average LOB mill levy for 2015-16 was 19.02. *See* Appendix C: 2015-16 Mill Rates Report.

For example, assuming that Kansas City, Kansas had a 20 mill LOB levy, under K.S.A. 72-6405 et seq. (the safe harbor for supplemental general state aid), Kansas City would have received equalization that resulted in an LOB budget of \$2,401 per pupil. *Id.* Assuming that same 20 mill LOB levy, the new formula would reduce the educational opportunity available to students in Kansas City by reducing the LOB budget to only \$1,924 per pupil. *Id.* On the other hand, a property-wealthy district like Blue Valley in Johnson County suffers no hardship due to the passage of H.B. 2655 since it received no supplemental general state aid under the prior formulas; under the new formula, if Blue Valley had a 20 mill LOB levy, Blue Valley's LOB budget would remain at \$2,444 per pupil. Id. Thus, Kansas City's LOB purchasing power relative to Blue Valley's LOB purchasing power has been reduced from 98.2% to 78.7%. As Exhibit D demonstrates, under H.B. 2655's new formula, 35 districts lose equalization that would have been received under the prior system. 232 districts receive less equalization than they would have received under the prior system. Thus, H.B. 2655's method is a decrease in equalization from the prior system. The yellow portion of the chart contained in Appx. B graphically represents the loss in equalization to the districts caused by H.B. 2655.

While the Legislature adopted H.B. 2655 under the guise of complying with *Gannon I* and *Gannon II*, it has once again "increased the wealth-based disparity between those districts

receiving the aid and wealthier districts ineligible to receive it, *i.e.*, *it has widened the existing* gap between them." Gannon II, 2016 Kan. LEXIS 8, \*84 (emphasis added). This Court should not accept this widened gap as evidence of compliance.

### E. Effects of H.B. 2655 On Particular Districts

When H.B. 2655 is applied to particular situations, the Legislature's "shell game" becomes immediately obvious. For example, under CLASS (which this Court has already found unconstitutional due to its inequities), the Wichita school district was to receive \$55,048,212 in supplemental general state aid. *See* Appendix D: Charts Demonstrating Effects of H.B. 2655, at ECB028, 033. This amount already represented a loss of \$5,132,809 from the "safe harbor" formula that existed prior to CLASS. *Id.* It was this loss of funding that the Court ordered the State to "fix" in *Gannon II*. But, rather than doing anything to fix the inequities exacerbated by CLASS (*i.e.* – by taking advantage of the "safe harbor" and reinstating the funding level to the \$60,181,021 required by K.S.A. 72-6405 *et seq.*), the Legislature *cut* Wichita's supplemental general state aid entitlement by \$6,045,648. *Id.* 

Then, by fully funding the capital outlay equalization aid formula, the Legislature restored \$4,508,756 to Wichita. *Id.* The increased amount of capital outlay state aid under H.B. 2655 supplanted some of the loss caused by reducing Wichita's entitlement to supplemental general state aid. Lastly, by the operation of the "hold harmless" provision, the Legislature restored the remaining \$1,536,892 cut from Wichita's supplemental general state aid. *Id.* Thus, H.B. 2655 had a net effect of zero for Wichita – there is zero change in the funding received by Wichita. By contrast, had the Legislature followed this Court's suggestion of the "obvious

solution" to the inequities affirmed by this Court, Wichita would have received an *additional* \$9,641,565 in equalization funding. *Id*.

When Wichita's situation is compared to the Olathe school district, the Legislature's intent in passing H.B. 2655 becomes all too clear. Olathe is one of the Johnson County school districts that is historically property-wealth, but appeared to be property-poor in 2014 due to fluctuations among districts in the AVPP. Oil prices were so high in 2014, that even the typically property-wealthy districts appeared poor. This caused Olathe, and other similar districts, to receive equalization aid. And, this just happened to be the same year that the adoption of CLASS froze all spending into place at the 2014 levels. Now that oil prices have fallen, property-wealthy districts like Olathe, that are currently receiving equalization aid under CLASS, would be placed in a worse position if the State went back to using the 'safe harbor" method of calculating equalization aid. Under CLASS, which froze the funding into place based on a district's AVPP in 2014-15, Olathe actually received an additional \$1,055,910 in supplemental general state aid. See Appx. D, at ECB030, 033. Taking advantage of the "safe harbor" would have resulted in a loss of that additional funding to a politically powerful Johnson County district. *Id.* But, the Legislature's H.B. 2655 "shell game" prevents that result and ensures that Olathe, like other politically powerful, property-wealthy districts, is "held harmless." While Olathe "suffers" a \$9,575,361 loss of supplemental general state aid income, that difference is made up by \$557,018 in additional capital outlay state aid and \$9,018,343 in "hold harmless" aid. Id. Again, the net result is that there is no change in the amount of funding received by Olathe under H.B. 2655, while the "safe harbor" would have resulted in a decrease in their state aid. The bill was not intended to fix equity; it was intended to ensure that

the State did not increase overall funding and to ensure that property-wealthy, politically powerful districts kept the increased aid that resulted from the adoption of CLASS.

The bill only equalizes districts to the block grant amount and does not lessen wealth-based disparities among districts; i.e., the stated goal of equalization. The Legislature achieved this result by acting in a way that held certain districts "harmless." Unfortunately, the only districts that the Legislature "held harmless" where those districts that never needed the benefit of equalization aid in the first place. Notably, the State did not, in any way, attempt to hold property-poor school districts "harmless" when it adopted CLASS and reduced the funding available to them. H.B. 2655 further exacerbates those inequities present in CLASS; the State's "fix" fixes nothing.

### **ARGUMENTS AND AUTHORITIES**

### A. Kansas' School Finance Formula Remains Unconstitutional Despite the Use of A <u>Transcriptionist</u>

In an attempt to address this Court's suggestion that "the State would help its case by showing its work in how it determined that any other proposed solution complies with *Gannon I*," the Legislature hired its own counsel and a transcriptionist to provide a transcript of a portion of the hearings held regarding the equity finance bills being considered during the 2016 legislative session. Chairman Ron Ryckman, Jr. made this purpose clear in his opening remarks to the Joint Legislative Budget Committee on March 21, 2016:

The courts, the revisors, and the Attorney General has made it clear that the legislature needs to create a record in going forward regarding equity in the creation of a new school finance plan. The courts has asked us to show our work... There is a transcriptionist here to assist in the creation of the record.

State's Appx. B, at 5:9-19. Chairman Ty Masterson echoed Chairman Ryckman's sentiments, and in doing so, laid bare the realities of the school funding process being engaged in by the Legislature. In his comments, Senator Masterson made clear that the Legislature was aware that the "purest response" to this Court's mandate would be to fully fund the old equalization formulas; however, due to political reasons, that proposed legislative response was unlikely to succeed and an "optional proposal" would likely be put forward. *Id.* at 6:5-7:3. At the time of these hearings, H.B. 2655 had not even been introduced. Of course, as Chairman Masterson was aware even at the time he made these comments, an "optional proposal" was forthcoming, namely his. That proposal is what was eventually adopted as H.B. 2655, the statute now before this Court.

But the Legislature's decision to proceed through the use of a transcriptionist to create a "record of evidence" is a far cry from what this Court found lacking in its February 2016 Opinion. The Court was not merely looking for documentary evidence that a set of hearings had taken place in Topeka, Kansas on certain dates. Indeed, that evidence tends to support this Court's earlier legal conclusion regarding the Legislature's intent on school finance matters, namely that it "reflects no other reason than a choice based on the amount of funds desired to be made available' by the legislature." R.Vol. 140, pp. 10; *Gannon I*, 298 Kan. at 1185.

The legislative record created through this method demonstrates that legislators *ignored* warnings of equity problems caused by H.B. 2655 and misrepresented the testimony provided to them. For example, in his explanation of vote, Senator Ty Masterson stated that he voted for the bill because:

Dale Dennis, of the Department of Education, expressly told me that this plan allowed sufficient flexibility to address any potential equity issues that may arise in the future. Based upon the testimony that he (and others) provided, I feel confident that this plan satisfies the Court's equity concerns and, if inequities arise in the future, sufficient funds will be within Mr. Dennis' discretion to resolve any potential disparity that may occur after enactment.

State's Appx. B, at 680. But Senator Masterson's statements are contradicted by Mr. Dennis' own testimony, as documented in the transcripts that the Legislature insisted on having to demonstrate compliance. Mr. Dennis specifically pointed out some of the difficulties associated with applying the capital outlay equalization formula to LOB equalization, as follows:

[S]ometimes we have a tendency to want to compare capital outlay with LOB, but capital outlay there is a difference. You have a cap. You can't go more than eight mills. So, if there's – it's equalization, why, it's got to be within that eight mills, where the LOB about the average tax rate there is in the 19, 20 mill range. So, it's much larger and the dollars involved are much greater, so – so anyway, I think that – there is a difference in the formulas, but there is also a difference in the taxing levy authorities.

State's App. B, at 75:23-76:9. Mr. Dennis also testified that "[t]here's not a significant increase in new money" in H.B. 2655. *Id.* at 337 (line 16-17). When Mr. Dennis was asked what problems he saw in H.B. 2655, he specifically testified that the change to apply the capital outlay method of equalization to LOB equalization could raise equity concerns:

[I]f there's an issue it will be the change and I think anybody involved in it would say this, when you change from the 81<sup>st</sup> percentile to the capital outlay equalization, somebody could raise that issue . . . that issue will no doubt be discussed 'cause you're changing the amount of dollars equalized in the LOB from one formula to another.

*Id.* at 338 (lines 3-11). Mr. Dennis also testified that, due to the operation of H.B. 2655, some school districts could raise their LOB mill levy to backfill the money taken out of their LOB through H.B. 2655, while others could not. *Id.* at 344 (lines 19-25), 245 (lines 1-9). As Mr. Dennis put it, "Some will choose to raise the mill levy, some will say my board won't do it; so,

they'll be all over the place. Local decision there." *Id.* at 345 (lines 6-9). Thus, the equity concerns that Plaintiffs raise here were already raised to the Legislature by Mr. Dennis. But Mr. Dennis' testimony was then misrepresented by a legislator and Mr. Dennis' warnings were ignored.

# B. The State Has the Burden to Demonstrate that H.B. 2655 Complies with the Court's Equity Test

As this Court held, "[o]ne obvious way the legislature could comply with Article 6 would be to revive the relevant portions of the previous school funding system and fully fund them within the current block grant system." *Gannon II*, 2016 Kan. LEXIS 8, \*111; (citing *Gannon I*, 298 Kan. at 1198). Portions of previously considered bills like S.B. 512 or H.B. 2731 would have done just that. But those bills were not adopted for various reasons. Some legislators voted against the bills because they actually increased school funding. Others were weary of other poisonous policy provisions contained in the bills. Nevertheless, the State ultimately passed H.B. 2655, which only revived the portions of the previous school funding system as related to capital outlay state aid and <u>not</u> supplemental general state aid. The State only took advantage of half of the "safe harbor" and left supplemental general state aid out to sea. This does not comply with the Court's Mandate.

As Senator Anthony Hensley put it in his protest of H.B. 2655: "Those [prior] formulas, in combination, pass the Supreme Court's equity test; this bill does not. The bill continues to create 'winners and losers.'" State's Appx. B, at 680; *see also id.* at 684-701 (containing the charts referenced by Sen. Hensley). The Legislature has failed to voluntarily revive the "relevant portions of the previous school funding system and fully fund them within the current

block grant system." Therefore, the Legislature has submitted the resulting bill, H.B. 2655, to an even stricter test:

But if the legislature rejects this solution [i.e., voluntarily reviving and fully funding the earlier provisions], any other funding system it enacts must be demonstrated to be capable of meeting the equity requirements of Article 6 – while not running afoul of the adequacy requirement. 298 Kan. at 1200 (explaining that although adequacy and equity are distinct components of Article 6, they do not exist in isolation from each other, so that a particular cure of equity infirmities may affect adequacy of the funding system).

Gannon II, 2016 Kan. LEXIS 8, \*111 (emphasis added).

And this Court held that "[t]he State has the express burden to show *compliance*" with this test, stating:

The State has been unable to provide evidence sufficient to show compliance with our *Gannon I* equity order for capital outlay. At oral argument, we expressed doubt about the State's contentions and *repeatedly asked its counsel to show the evidence we could rely on to conclude it had cured the constitutional inequity*. Despite our invitations, counsel could point us only to spreadsheets of raw data showing the distribution of the money made available, which failed to establish anything other than more money was provided than before. Expressed in the language of our equity test, these spreadsheets did not show that this increase *provided students in districts entitled to capital outlay state aid with reasonably equal access to substantially similar educational opportunity through similar tax effort.* Therefore, we conclude the State failed to carry its burden to show its alterations to the capital outlay state aid formula for fiscal year 2015 cured the unconstitutional wealth based disparity affirmed to exist in *Gannon I*.

Gannon II, 2016 Kan. LEXIS 8, \*\*63-64 (emphasis added).

Therefore, the State has a burden to provide evidence that H.B. 2655 actually does provide students in districts entitled to capital outlay state aid and supplemental general state aid with "reasonably equal access to substantially similar educational opportunity through similar tax effort." A review of the transcripts produced by the Legislature demonstrates that, in almost 800 pages worth of testimony, the Legislature never directly evaluated the effects of H.B. 2655

applying this Court's equity test. Quite simply, H.B. 2655 does not meet the equity test. Just like CLASS did, H.B. 2655 "reduc[es] the supplemental general state aid to affect only lower-property wealth districts." *Id.* at \*84. The resulting effect is that the legislature has "*increased* the wealth-based disparity between those districts receiving aid and wealthier districts ineligible to receive it, *i.e.*, it has widened the existing gap between them." *Id.* (emphasis added).

### C. H.B. 2655 Fails the Court's Equity Test

The relevant inquiry here is, under H.B. 2655, do districts have reasonably equal access to substantially similar educational opportunity through similar tax effort? Clearly, they do not. H.B. 2655 does nothing to actually equalize the disparate purchasing power among districts that result from differences in local wealth. Indeed, as the factual description above demonstrates, for Plaintiffs and the vast majority of districts, the statute merely provides districts with the same amount of money by distributing the money from three "buckets" instead of two. The same amount of money that was previously provided in the form of capital outlay equalization aid and supplemental general state aid is now provided in the form of an increased capital outlay equalization aid, a decreased supplemental general state aid, and the newly created school district equalization state aid (also referred to as "hold harmless" aid). It is a continued freeze of equalization payments at the current levels accomplished through the artifice of a "hold harmless" provision that benefits wealthier school districts. A district like Wichita or Kansas City receives the same amount of equalization aid that was provided to it in February of this year when the Court found CLASS to be unconstitutional. Because H.B. 2655, like CLASS, fails to meet this Court's equity test, this Court should determine that the State has failed to cure the inequities that were affirmed to exist in Gannon I.

## 1. CLASS, As Amended by H.B. 2655, Does Not Comply with this Court's Equity Test, as Set Forth in *Gannon I*

H.B. 2655's use of the capital outlay equalization formula to calculate supplemental general state aid guarantees that districts will not have reasonably equal access to substantially similar educational opportunity. Very clearly, the districts do not – under the new formula – have **reasonably equal access** to supplemental general state aid. Instead, districts are locked in at an LOB budget that is dependent on an election that was required to have taken place on or before July 1, 2015. R. Vol. 140, p.14 (FOF ¶¶ 38-39). Thus, districts were required to look into the future, guess that the State would adopt H.B. 2655 to lower the supplemental general state aid to which they would be entitled, and have an election on or before July 1, 2015. This is an absurdity. And this does not take into account the demonstrated fact that the election process itself is inherently unfair, allowing the constitutionality of funding to rise and fall on the whim of local voters. R. Vol. 140, p.14 (FOF ¶40). Because a district's wealth largely determines their ability to pass an election, the State's continued reliance on the result of local elections to determine funding levels are detrimental to property-poor school districts. See Appendix M: Plaintiffs' Previous Equity Exhibits, at Pls' Ex. 504; see also R.Vol. 131, at Pls' Ex. 503-504; R.Vol. 135, p.1409 (Order, filed 6/24/15, p.2); R.Vol. 140, p.15 (FOF ¶40).

Furthermore, under the capital outlay state aid formula, similar educational opportunity could not be achieved **through similar tax effort**. R.Vol. 140, p.18 (FOF ¶45). As Plaintiffs have previously explained, relying on the capital outlay equalization formula results in a wide variance of tax effort required by districts to raise aid. *See e.g.*, Appx. M, at Ex. 624; R. Vol. 140, p. 18. (FOF ¶46); R.Vol. 131, at Pls' Ex. 624; R.Vol. 135, p.1412. The State simply cannot demonstrate compliance with the equity test.

It is undeniable that the method for calculating capital outlay state aid results in inequities. R.Vol. 140, pp. 15-18 (FOF ¶¶41, 43-44); Brief of Appellees, submitted September 1, 2015. While this Court has suggested – through its safe harbor – that those inequities do not violate the Constitution for purposes of calculating capital outlay state aid, the same cannot be said with regard to applying that formula to calculate supplemental general state aid. Practically, there are three reasons for this. First, the funding associated with supplemental general state aid is much larger. Compare Appendix E: Memo from Dennis, dated 3/21/16 (containing SF 16-117) with Appendix F: Memo from Dennis, dated 3/14/16 (containing SF 16-117) (LOB Total \$1,061,277,923, LOB Local \$610,786,410, CO Total \$243,596,093, CO Local \$216,305,637). As a result, the inequities already present in the capital outlay equalization formula are amplified. See also State's Appx. B, at 75:23-76:9 (in which Mr. Dennis testifies regarding this concern). Second, the purposes of the two funds are different. Capital outlay state aid is used for important purposes (fixing roofs, updating technology, purchasing buses, etc.). But, supplemental general state aid goes straight to the classroom and is much more important. Third, as Mr. Dennis explained, there is *less* need for equalization related to raising money for capital outlay because districts are capped at 8 mills. *Id.* In other words, within the capital outlay statutes, there is a built-in cap on tax effort mechanism for equalizing the tax efforts by keeping all districts within an 8-mill cap, thereby limiting the potential for vast disparity based on local property wealth. That built-in cap on tax effort mechanism does not exist within the LOB statutes and the differences in mills levied among districts is much larger. See Appx. M, at Ex. 624-625. When the vast disparity in property wealth as expressed in assessed valuation per pupil is considered, the effects of applying the capital outlay equalization

formula to supplemental general state aid are magnified exponentially. *See* Appendix G: Assess Valuation Per Pupil Chart. As Appendix G demonstrates, the poorest districts have assessed valuations per pupil ("AVPP") of \$1,550 (Ft. Leavenworth) and \$21,928 (Galena); the wealthiest district has an AVPP of \$547,862 (Burlington). The median AVPP is \$74,129. Clearly, the combination of these vast disparities in property-wealth and the disparities in mills levied amongst districts for LOB generates a higher need for equalization than the relatively limited disparities in mills levied for capital outlay equalization. This is precisely why a different formula is needed for LOB equalization than for capital outlay equalization to lessen the disparity in purchasing power due to district property wealth. There is simply no education-based reason on which the State relied when it decided to apply the admittedly flawed capital outlay equalization formula to calculate supplemental general state aid.

### 2. <u>H.B. 2655 Causes Increased Equity Concerns</u>

H.B. 2655 contains a "hold harmless" provision that causes increased harm to those districts that are already negatively impacted by their lack of property wealth. As this Court, the Panel, and Plaintiffs all noted, one of the most devastating aspects of CLASS was that "by reducing the [equalization aid] to affect only lower-property wealth districts, the legislature has increased the wealth-based disparity between those districts receiving the aid and wealthier districts ineligible to receive it, *i.e.*, it has widened the existing gap between them." *Gannon II*, 2016 Kan. LEXIS 8, \*84. It is surprising, then, what great lengths the State has gone through in holding property-wealthy districts harmless here, when there was no attempt to hold the property-poor school districts harmless in adopting CLASS.

H.B. 2655 only exacerbates the already-existing inequities. H.B. 2655 lowers the State's portion of almost all districts' LOB fund by lowering the amount of supplemental general state aid the districts' receive. (The amount of "hold harmless" aid that a district receives is deposited into the district's general fund instead of their LOB fund. Supplemental general state aid would have been deposited into the LOB fund, much like any increase to capital outlay state aid is deposited to the district's capital outlay fund.) Because a district's LOB amount is already locked into place, if the State pays a lower portion of that LOB amount (as the State will do for almost all districts under the operation of H.B. 2655), districts will have the ability to "backfill" the gap through paying a larger share of the LOB amount through local property tax money, if the local taxpayers can pay a larger share of the LOB. The property wealth of the district will largely dictate whether that is a possibility because of the correlation between a district's wealth and their political ability to increase local property taxes. See Gannon Panel Decision, Dec. 30, 2014, at p. 65 (noting the "practical limits to [a district's] property tax raising resources and local interest and concern ... that drive the creation of, or size, of a local option budget."); Gannon Panel Decision, June 26, 2015, at pp. 50, 53-54 (finding that "taxwealthy districts will have their educational goals honored, preserved, and funded ... while those needing aid will be at the burden of increased, but unsubsidized, taxation as their price of increased budgeting choice" even though "property poor districts ... for which there is no realistically assured tax base nor any equitably-based tax alternative for funding, turn[] the struggle for adequacy in many of these districts into ones of just survival."); see also Appx. M, at Ex. 504; Vol. 131, at Pls' Ex. 503-504; R.Vol. 135, p. 1409; R.Vol. 140, p.15 (FOF ¶40). Clearly, districts with lower AVPPs will face significant political barriers to "backfilling" their

LOB fund that more property-wealthy districts will not face. As the plaintiffs in the *Petrella* litigation have repeatedly made clear: "Every request submitted to SMSD voters requesting local tax increases for local public education has passed without objection." *See, e.g.*, Appendix H: Excerpts from Plaintiffs' Motion for Summary Judgment and Declaratory Judgment, filed in *Petrella, et. al v. Brownback, et al.* 

As a result, H.B. 2655 does not provide reasonably equal access to substantially similar educational opportunities through similar tax effort. Instead, like CLASS, it further widens the existing gap between districts receiving the aid and those without a need for it.

The disparate additional resources available to districts through this "backfilling" mechanism are graphically demonstrated on Appendix I: Chart Demonstrating Unequal Additional Resources Available. As this chart shows, school districts vary widely in the amount of additional resources available per pupil to be backfilled under H.B. 2655. The amount that can be backfilled equals the amount in the decrease in state aid for LOB; this amount essentially becomes additional funding that a district can raise locally, and the potential resources vary widely across districts. For example, 66 districts have no access to additional "backfill" resources and 109 districts can raise only up to \$250 more per pupil locally. But, 74 districts can raise between \$250 and \$500 per pupil, and 30 districts can raise between \$500 and \$750 more per pupil locally. Astoundingly, a few districts can raise more than \$750 per pupil in local funding through the operation of H.B. 2655. This clearly shows that districts do not have substantially similar educational opportunity. In addition, the amounts available for backfilling generally increase the higher a district's AVPP is. This amounts to no reasonably equal access for school districts.

Similarly, Appendix J demonstrates that the mills required to access these varying levels of "backfilling" resources also varies widely across districts. *See* Appx. J: Chart Demonstrating Mills Required to Access Additional Resources. This shows that H.B. 2655 does not result in similar tax effort among districts. *Id.* For example, while Galena would need to increase its mill levy by 5.9 mills to fully backfill the available \$129 per pupil it will be allowed under H.B. 2655, Gardner-Edgerton would only need to increase its mill levy by 2.7 mills in order to reach the same result. This is directly correlated to the fact that Gardner-Edgerton's AVPP is more than double that of Galena's, which shows that backfilling only *increases* the effect of disparity amongst districts in terms of property wealth. Clearly, the backfilling maneuver created by H.B. 2655's provisions fails all three prongs of the *Gannon* equity test.

In sum, the ability to backfill allows wealthier districts to retain more resources and thus retain the ability to provide more educational opportunity. This allows the wealthier districts to keep both their wealth and the advantage given to them by CLASS. *See, e.g.*, R.Vol.137, p.1453-54 (finding that CLASS "maintain[s] an unjustifiable wealth based disparity"). Just as under CLASS, the property wealthy districts "remain unscathed, and only those that had demonstrated need are tasked with paying the price of the capital outlay state aid reductions." *Id.* These districts are still required to "[c]annibaliz[e]... other operating funds or needs... commensurate to the unsatisfied need." *Id.* H.B. 2655's system runs directly counter to the purpose of equalization aid which is supposed to "equalize" purchasing power. Instead, H.B. 2655 ensures that the wealthier districts retain their advantages over less wealthy districts and thus fails the equity test.

# 3. <u>The Legislature's Motivation for Adopting H.B. 2655 Was Not to Cure the Inequities Affirmed by this Court</u>

The State can provide no justification for why the State has, once again, prorated equalization aid – not based on a reduced need for equalization – but rather, based on "the amount of funds" that the Legislature "desired to be made available." *Gannon*, 298 Kan. at 1185. This Court has already condemned that act.

And, "it logically follows that the inequity that equalization aid was designed to cure remains present." *Id.* Once again, the State has lowered the equalization aid available to a district but is unable to point to anything "in the record demonstrating that the inequity was eliminated or lessened on its own or by other means." *Id.* 

Apparently seizing on the Court's language suggesting that constitutional equity could be achieved without fully funding the previous equalization formulas, the State knowingly and intentionally adopted CLASS to provide less than full funding for those equalization mechanisms. R.Vol. 140, pp. 9-10 (FOF ¶19); see also R.Vol.130, p.76. Now, the State has applied an inequitable formula to an even larger, more important funding source for educational opportunity: supplemental general state aid. The intent in adopting H.B. 2655 was similar to the intent in adopting CLASS; the State can point to no other reason for the adoption of H.B. 2655 aside from "a choice based on the amount of funds desired to be made available' by the legislature." Gannon I, 298 Kan. at 1185. And, as intended, H.B. 2655 results in the State not having to increase the amount of funds earmarked for education. But as this Court has previously found, when the evidence demonstrates that an "amended formula when fully funded provides less [equalization aid] than the previous one would have provided had it been fully funded... the amended formula is structurally less equitable." Opinion at 41. Thus, far from

curing the inequities affirmed by this Court, the State has exacerbated those inequities. And, it did so intentionally.

The State argues that there was no education-based policy behind the adoption of the supplemental general state aid formula in the first place. *See, e.g.,* Brief of Appellant Concerning Legislative Cure ("Appellant's Brief") at 5-7. That is false. The supplemental general state aid formula was adopted in direct response to this Court's orders in *Montoy*. When the Legislature adopted an equalization scheme that only equalized to the 75th percentile, the Court would not approve it. *Montoy v. State,* 279 Kan. 817 (2005) (Montoy IV). But, when the State adopted a supplemental general state aid formula that calculated equalization aid based on the AVPP of the district at the 81.2 percentile, the Court found that "the legislature responded to our concerns about wealth-based disparities inherent in the LOB by increasing the equalizing LOB state aid AVPP percentile." *Montoy v. State,* 282 Kan. 9, 28-29 (2006) (Montoy V). The clear education-based policy behind the adoption of that formula was the provision of aid in a manner that comported with the equity components of the Kansas Constitution. Increasing the LOB state aid AVPP percentile reduced wealth-based disparities.

Importantly, the State misconstrues the testimony of Dale Dennis. Mr. Dennis testified regarding the 81.2 percentile formula: "[P]art of it was property tax driven and part of it was they chose, the legislators did, to try to equalize as high as they could go at that time . . . ." *See* Appellant's Brief at 6-7, State's Appx. B, at 76-77. But this is consistent with the Court's holdings in its *Montoy* and *Gannon* decisions; part of the equity test involves "similar tax effort." The legislators were required by this Court in *Montoy IV* to "equalize as high as they could go"; the 75 percentile had already been found to be unconstitutionally inequitable. Under

this Court's holdings, similar tax effort is part of the "education-based policy" of the equity requirements of Article 6, Section 6.

On the other hand, the adoption of H.B. 2655 is clearly not based on any education-based policy. Here, when the Court raised concerns about the disparities inherent in the LOB, the Legislature responded by *decreasing* the equalizing LOB state aid AVPP percentile from the 81.2 percentile to an effective percentile of 68.8. There is simply no evidence to demonstrate that this somehow "cured" the equity issues affirmed to exist by this Court, or that an LOB equalization mechanism that equalizes to a lower percentile than that found unconstitutional in *Montoy IV* somehow now meets the constitutional requirements.

## 4. <u>H.B. 2655 Failed to Comply with *Gannon I Because It Did Not Cure Inequities for* FY15, FY16, and FY17</u>

Gannon II instructed the State to comply with Gannon I. See Gannon II, slip op. at p.74. In Gannon I, this Court mandated that the State cure the existing inequities for FY15 and going forward. Gannon I, 298 Kan. at 1198. Because this Court gave the State a second chance to do what it should have done in response to the March mandate, compliance required action for FY15 going forward. Therefore, H.B. 2655 did not comply with Gannon II.

# D. Failing to Take Advantage of this Court's Safe Harbor Subjects H.B. 2655 to Strict Compliance With this Court's Adequacy Test, Which it Fails

The Legislature's failure to voluntarily revive the "relevant portions of the previous school funding system and fully fund them within the current block grant system" subjects H.B. 2655 to the following test:

But if the legislature rejects this solution [i.e., voluntarily reviving and fully funding the earlier provisions], any other funding system it enacts must be demonstrated to be capable of meeting the equity requirements of Article 6 – while not running afoul of the adequacy requirement. 298 Kan. at 1200

(explaining that although adequacy and equity are distinct components of Article 6, they do not exist in isolation from each other, so that a particular cure of equity infirmities may affect adequacy of the funding system).

Gannon II, slip op. at 73-74 (emphasis added). As demonstrated above, H.B. 2655 cannot meet the equity test. But, just as glaring as H.B. 2655's failure to meet this Court's equity test is its failure to cure the inadequate level of funding already determined unconstitutional by the Panel. The Panel found that school finance in Kansas was inadequately funded to the tune of well over \$500 million per year. H.B. 2655 was intended to be essentially revenue-neutral, and does nothing to correct the legislature's failure to provide public education financing that – "through structure and implementation – is reasonably calculated to have all Kansas public education students meet or exceed the standards set out in *Rose* and presently codified in K.S.A. 2013 Supp. 72-1127." Gannon I, 298 Kan. at 1170. Thus, H.B. 2655 must be rejected for failing the Court's adequacy test as well.

Moreover, the State takes for granted that it can rely on local property taxes to adequately fund education in Kansas. But, the Kansas Supreme Court has warned that it is only permissible to rely on local money "to the extent that funding *remains constitutionally equalized.*" *Montoy IV*, 279 Kan. at 839-40 (emphasis added). Under H.B. 2655 "the wealthier districts will be able to generate more funds for elements of a constitutionally adequate education that the State has failed to fund." *Id.* at 839. The State's failure to constitutionally equalize the money that it relies on from local property assessments strips the State of its ability to rely on that funding as part of its efforts to comply with Article 6 of the Kansas Constitution. This Court has previously informed the State that local tax assessments "are not acceptable as a substitute for the State funding the legislature is obligated to provide under Article 6, § 6. That

should pre-exist the local tax initiative." *Id.* at 839-40. The State's adoption of H.B. 2655 ignores this warning.

Finally, H.B. 2655 does not change the structure of CLASS, which was wholly unconstitutional when adopted. The Panel appropriately found that CLASS, which is "blind to any changes in the number and demographics of the K-12 student population," was unconstitutional on its face. R.Vol.137, p.1433, pp. 1475-79. As the Panel correctly found "[t]his method of state aid distribution ... can find no accepted factual basis or principle that has ever been approved by any court or supported by any expert or educator for determining the appropriate financing of Kansas K-12 schools." *Id.* Indeed the Panel found this "flat funding mechanism" "so pernicious and its negative effects so immediate" that it issued a temporary restraining order (later stayed by this Court) in an attempt to mitigate those pernicious effects. *Id.* The State has wholly failed to mitigate those affects in adopting H.B. 2655. Because of this failure, H.B. 2655 "runs afoul of adequacy" and does not pass the Court's test as set forth in *Gannon II*.

#### E. The State's Arguments in Support of H.B. 2655 Fail

In its Brief, the State sets forth several arguments in support of H.B. 2655. These arguments are designed to distract this Court's attention from the fact that H.B. 2655 does nothing to change the relative purchasing power of districts based on their differing property wealth and therefore does nothing to cure the inequities affirmed by this Court. While H.B. 2655 does cure the inequities in the capital outlay equalization aid by adopting this Court's suggested remedy, the State has failed to cure the inequities in the LOB system. The State's arguments fail.

1. <u>Applying the Capital Outlay Equalization Formula to Supplemental General State</u>
<u>Aid Increases the Inequities Identified By This Court</u>

The State argues that H.B. 2655 cures the inequities in the LOB system by adopting the same equalization formula this Court approved as constitutional for capital outlay equalization aid. Appellant's Brief at 14-15. Again, the State argues the 81.2 percentile standard "had no basis in educational policy." *Id.* at 14. The State suggests that "[i]t is difficult, if not impossible to argue with the logic that, if the formula used for capital outlay equalization is constitutional, why would that same formula not also be constitutional for equalizing LOB?" *Id.* 

The first step towards answering the State's allegedly "impossible" question would be for the Legislature to actually listen to the testimony of the witnesses that came before it. Dale Dennis specifically pointed out some of the difficulties associated with applying the capital outlay equalization formula to LOB equalization, as follows:

[S]ometimes we have a tendency to want to compare capital outlay with LOB, but capital outlay there is a difference. You have a cap. You can't go more than eight mills. So, if there's – it's equalization, why, it's got to be within that eight mills, where the LOB about the average tax rate there is in the 19, 20 mill range. So, it's much larger and the dollars involved are much greater, so – so anyway, I think that – there is a difference in the formulas, but there is also a difference in the taxing levy authorities.

State's Appx. B, at at 75:23-76:9. When Mr. Dennis was asked what problems he saw in H.B. 2655, he specifically testified that the change to apply the capital outlay method of equalization to LOB equalization could raise equity concerns:

[I]f there's an issue it will be the change and I think anybody involved in it would say this, when you change from the 81<sup>st</sup> percentile to the capital outlay equalization, somebody could raise that issue . . . that issue will no doubt be discussed 'cause you're changing the amount of dollars equalized in the LOB from one formula to another.

*Id.* at 23:3-11.

The concerns Mr. Dennis expressed to the Legislature are precisely why H.B. 2655 fails to cure the LOB inequities. As discussed above, the practical effect of applying the capital outlay method of equalization for calculating supplemental general state aid effectively *increased* the disparity between the property-wealthy districts and the property-poor districts. *Supra*. As demonstrated above, while adopting the safe harbor would have resulted in Kansas City's having approximately 98.2% of Blue Valley's LOB purchasing power, under H.B. 2655, that is reduced to 78.7%.

This result would have been no surprise to the *Montoy IV* Court. It specifically reviewed and rejected an LOB equalization scheme that would have equalized only to the 75th percentile. H.B. 2655 only equalizes to the 68.8th percentile. This cannot meet the Court's equity test.

Furthermore, this disequalizing result is not surprising given the substantially larger amount of dollars involved and the larger range of possible mill levies involved, just as Mr. Dennis testified. *Supra*. Since districts are only allowed to raise up to 8 mills in capital outlay levies, less equalization is needed to keep the districts relatively close in purchasing power. But, since LOB mill levies range widely from 0 mills in Meade to 39.386 mills in South Haven, and with the value of a mill ranging from \$2,178.35 in Leavenworth to \$3,022,419.95 in Shawnee Mission, the potential for vast disparities arises in the LOB system, and it requires more equalization, as this Court found in *Montoy IV*.

Also, the State's reliance on the approximately \$15 million in the extraordinary needs fund to attempt to remedy any remaining disparities is clearly insufficient. Appellant's Brief at 17. The cost of funding equalization for FY15, FY16, and FY17 is approximately \$162 million.

See Exhibits B-D to Plaintiffs' Motion to Modify Court's Order to Clarify Certain Language.<sup>5</sup> H.B. 2655 adds no new equalization funding. While \$15 million, if dispersed appropriately, could reduce the disparities somewhat, the State has provided no evidence that it would reduce the disparities to a constitutional level; it certainly would not reduce it to the level this Court previously found to be constitutional, because that would cost more than \$162 million. The State therefore fails to meet its burden of proof.

While the Legislature adopted H.B. 2655 under the guise of complying with *Gannon II* and *Gannon II*, by applying the capital outlay equalization formula to LOB equalization aid, it has once again "increased the wealth-based disparity between those districts receiving the aid and wealthier districts ineligible to receive it, i.e., it has widened the existing gap between them." Gannon II, 2016 Kan. LEXIS 8, \*84 (emphasis added). This Court should find that the capital outlay formula is not constitutional for equalizing LOB.

# 2. The State's "Mathematical Evidence" Purporting To Show Decreased Disparity Under H.B. 2655 Is Misleading

The State argues that the Legislature "considered precise mathematical evidence which demonstrated that adopting the capital outlay equalization formula for LOB equalization formula for LOB equalization would reduce disparities to their lowest level in recent years." *See, e.g.,* Appellant's Brief at 15. This "precise mathematical evidence," however, is both

<sup>&</sup>lt;sup>5</sup> The cost of funding those equalization mechanisms for FY15, FY16, and FY17, is summarized here:

	Fiscal Year	Fiscal Year	Fiscal Year
	2015	2016	2017*
Total Additional Appropriation Needed:	53,734,035	70,970,069	38,616,174

-

misleading and fails to take into account the impact of the "hold harmless" aid on the equalization system as a whole.

Interestingly, in the brief the State initially filed with the Court, the State made the bolder claim that "[t]he Legislature considered precise mathematical evidence which demonstrated that adopting the capital outlay equalization formula for LOB equalization would reduce disparities more than retaining the old LOB formula." See e.g., Appendix K: Original Brief Filed by State, at ECB132, 148. However, after claiming a "clerical error", the State replaced this obviously false statement in an amended filing with the lesser (but, still inaccurate) claim that "[t]he Legislature considered precise mathematical evidence which demonstrated that adopting the capital outlay equalization formula for LOB equalization formula for LOB equalization would reduce disparities to their lowest level in recent years." See Appellant's Brief at 15; Appx. K, at ECB159. Clearly, at some point, even the State recognized that its adoption of the capital outlay equalization formula for LOB equalization was less equalizing than fully funding the old LOB formula would have been.

More importantly, however, the "precise mathematical evidence" the Legislature reviewed and presents to this Court is misleading. First, by looking at the number of mills required to generate the non-state portion of 25% adopted LOB, the Legislative Research Department's analysis selects an artificial number that does not correlate to most of the LOB percentages adopted by most school districts; at most, it demonstrates a hypothetical situation that does not match reality. Second, by utilizing quintiles and averaging the mills required to generate the non-state portion of a hypothetical LOB percentage, the State hides the vast disparities among individual districts, even within each quintile. *See* Appendix L: Quintile Data

from Kansas Legislative Research Department. Appendix L is the data relied on by Mr. Penner in his analysis presented to the Legislature, and shows the relevant data for each *district*, rather than just each *quintile*. The data for 2016-17 shows a range of AVPP among the districts just in the "wealthiest 20%" from \$117,967 to \$547,862 and a range of mills required to generate non-state portion of 25% adopted LOB ("mills required") from 3.856 to 23.960. Clearly, the averages in the quintile analysis hide the problem.

But, more tellingly, any mitigation of the disparity between the quintiles as demonstrated in Mr. Penner's chart is wholly explained by natural fluctuations in assessed valuation from year to year. For example, in 2013-2014 the difference in AVPP between the "poorest 20%" and the "wealthiest 20%" was \$157,334. In 2014-2015, that difference went up to \$174,018. As Mr. Penner's analysis demonstrates, the difference in "mills required" between those quintiles also increased, from 4.225 to 5.456. But then, in 2015-2016, the difference in AVPP decreased to \$143,717. And, Mr. Penner's analysis demonstrates, not surprisingly, that the difference in "mills required" also declined, from 5.456 to 3.148.

It comes as no surprise that differences in the disparity would be due to natural fluctuations rather than legislative activity; the legislature merely renamed the aid and gave it back to the districts in the same amounts. No aid was taken away from the wealthiest districts, and no new equalization aid was given to the poorer districts. The Legislative Research Department's analysis simply does not take into account the *disequalizing* effect of the "hold harmless" provisions. Even if the particular disparity defined by the Legislative Research Department's completely hypothetical analysis has been decreased, that disparity is put back into place by the "hold harmless" aid that ensures that the wealthier districts' total aid package

is not reduced by the adoption of the formula that supposedly reduces the disparities. But, if the wealthier districts' overall aid is not decreased, which it is not due to the hold harmless aid; and the poorer districts' overall aid is not increased, which it is not; then there has been no effect whatsoever on the overall disparities in the equalization system. Looking at the LOB formula in isolation gives a skewed picture of the effects of H.B. 2655.

But, the ability to backfill LOB creates more inequity. Obviously, the property wealth of the district will largely dictate whether a district can take advantage of any backfill possibilities because of the correlation between a district's wealth and their political ability to increase local property taxes. Districts with lower AVPPs will face significant political barriers to "backfilling" their LOB fund. On the other hand, many of the wealthier districts will not face those political barriers and will be able to "backfill" their LOB entirely, thereby increasing the distance between themselves and property-poor districts even further. *Supra*. H.B. 2655 does not provide reasonably equal access to substantially similar educational opportunities through similar tax effort.

#### 3. The Hold Harmless Provisions Are Disequalizing

As demonstrated above, the hold harmless provisions have *disequalizing* effects that serve only to ensure that the differences in purchasing power among the districts remain at exactly the same level under H.B. 2655 as they were when this Court found CLASS unconstitutional. The State, however, argues in favor of these provisions based on testimony from several sources, including representatives of two of the Plaintiff districts that it ensures that districts "do not receive less than last year" or that they "appreciate[d] efforts to hold districts harmless." *See* Appellants Brief at 18-20, citing testimony from Kansas City, Kansas

superintendent Cynthia Lane and Wichita Public Schools' Chief Financial Officer Jim Freeman.

The State's argument in this respect is beyond galling. Kansas City, Kansas is currently suing the State of Kansas for its unconstitutional failure to provide adequate funding. Kansas City, Kansas' superintendent Cynthia Lane testifies that she is glad districts will "not receive less than last year" under H.B. 2655. But the State omits the bulk of Ms. Lane's testimony regarding the hold harmless provision:

What is different with this hold harmless portion is that it is holding us harmless to levels of funding that, frankly, have been deemed not equitable. So, in past times, you've held harmless after you corrected the deficiencies in the formula. So, we want to celebrate the hold harmless piece, we think that's critically important so there aren't consistent winners and losers in the process, but we encourage you to do so after correcting the challenges.

State's Appx. B, at 500 (lines 10-13 (emphasis added)). All Ms. Lane (and the Plaintiffs) are arguing is that their intention is not to take funding from other school districts; as Ms. Lane testified: "[t]hat's always been important to us to make sure not only students in Kansas City, Kansas public schools receive quality education, but it's important that the entire state does as well." *Id.* (lines 1-5). Rather, Plaintiffs seek *more* equalization funding that would serve to actually reduce the disparities among districts. But, of course, any superintendent (especially one currently suing the State for inadequate funding) would be glad to see that pending legislation would not reduce her district's funding even further.

By ignoring the import of the bill's opponents' testimony, the State attempts to transform a "sigh of relief" that the Legislature did not harm districts even more than it has in the past into an unequivocal vote of support for a *disequalizing* provision of the bill. This Court should see through this frankly disingenuous effort on the part of the State.

## F. In Light of the State's Repeated Failure to Cure the Inequities Present in the Current Funding System, This Court Should Exercise Its Equitable Power to Remedy the Inequities

As the State admits, "[i]n an equitable relief setting, this Court has 'inherent power to enforce [its] holdings." Appellant's Brief at 22 (quoting *Gannon II*, slip op. at 67). This Court, therefore, has several tools in its toolbox to ensure that the inequities it previously affirmed have been remedied:

#### 1. Lift the Court's Stay of the Panel's Order With Regard to the Equalization Formulas

The most efficient method of remedying the current unconstitutionality of the school finance formula is to lift this Court's July 30, 2015 Stay of the Panel's June 26, 2015 Order. The Panel's Order was appropriate, supported by competent factual findings, and constitutional. *See, e.g.*, Plaintiffs' Equity Brief, filed September 1, 2015, at Arguments and Authorities §B. The Panel appropriately crafted a remedy designed to cure the inequities that this Court affirmed in its Mandate. In doing so, the Panel paid careful attention to issues related to the separation of powers, as this Court instructed. This Court stayed the Panel's order to "give the legislature a second, and substantial, opportunity to craft a constitutionally suitable solution and minimize the threat of disruptions in funding for education." *Gannon II*, 2016 Kan. LEXIS 8, \*108. The State responded with a financial shell game that exacerbated the equity problems found by the Panel and affirmed by this Court. As this Court has often been forced to do in the remedy phase of school finance litigation, it must now "reject[] legislation that increased or exacerbated inequities among districts in evaluating action taken by the legislature in the remedial stage." *Id.* at \*49 (citing *Gannon I*, 298 Kan. at 1173-74). The State can identify no

basis for a third bite at the apple or this Court's further continuing to stay the Panel's remedy.

Therefore, this Court should exercise its equitable authority and lift its stay.

As this Court found, lifting its stay with regard to the equalization aid provisions would have the following effects.

- (a) It would reinstate the capital outlay state aid formula as it existed prior to January 1, 2015, and would require certification of payments of capital outlay state aid for fiscal year 2015, 2016 and 2017 calculated based on that formula.
- (b) It would reinstate the previous supplemental general state aid formula and would require certification of payments of supplemental general state aid for fiscal year 2015, 2016, and 2017 calculated based on that formula.

See Gannon II, slip op. at 19-20. As the Court noted, the Panel did not order additional appropriations for capital outlay state aid or supplemental general state aid. *Id.* Thus, this Court, as the Panel did, could "rely on each legislator's solemn oath of office and respect for our constitutional form of government to provide such [appropriation] authority" if it chose this remedial option and lifted its stay. *Id.* at 19.

#### 2. Strike CLASS and H.B. 2655 as Unconstitutional; Shutdown Kansas Public Schools

Given that neither CLASS nor HB2655 meets this Court's stated equity test, those enactments may be stricken as unconstitutional. As the Court held in *Gannon II*, "[w]ithout a constitutionally equitable school finance system, the schools in Kansas will be unable to operate beyond June 30." *Gannon II*, slip op. at 75. While this principle is undoubtedly true, a complete school shutdown on June 30 would have detrimental and long-lasting effects on both Kansas school districts and their students. As a result, Plaintiffs would suggest that if the Court determines that school closure is necessary, it provide a remedial order to minimize damage to the education infrastructure.

## 3. <u>Strike CLASS and H.B. 2655 as Unconstitutional; School Shutdown Results But Damage to the Education Infrastructure is Minimized</u>

The Court in its discretion could strike the current school funding system under CLASS and H.B. 2655 but utilize its equitable power to minimize damage to the education infrastructure during the pendency of the shutdown. This scenario would require that the Court allow the continued use of any balances on hand, such as contingency reserve funds, to minimize damages. Additionally, the Court could order any necessary appropriations. Should the Court adopt this remedy, Plaintiffs would ask that the parties be allowed to brief the Court on the potential damages to education infrastructure and what would be required to minimize those damages. For example, the Plaintiffs would request that they be allowed to distribute funds to achieve the following:

- 1. Make payments toward general obligation bonds, warrants and leases, lease-purchase agreements, and other already-incurred obligations relating to the acquisition of capital assets;
- 2. Make payments to insurance companies for purposes of maintaining critical insurance coverage during any shutdown;
- 3. Make payments to staff/entities for purposes of providing critical maintenance services during any shutdown;
- 4. Make payments for purposes of providing on-site security for district property during any shutdown;
- 5. Make payments necessary to maintain critical utilities during any shutdown;
- 6. Make payments to employees for services rendered prior to any shutdown and to maintain employee benefits during any shutdown; and
- 7. Make payments to employees to perform critical services during any shutdown.

Plaintiffs again request further briefing on these issues to allow the Court to craft a remedy that prevents any unnecessary harms to Kansas' students and schools, should the Court ultimately determine to shutdown Kansas public schools.

#### 4. Enforce the Legislature's Positive Duty to Equitably Fund School Finance

The State argues that this Court cannot exercise its authority to "consider . . . any remedy – including the Panel's attempted remedy – that would direct the legislature to amend or repeal statues or to appropriate particular funds." Appellant's Brief at 22-23. The State argues that to do so would violate the separation of powers doctrine and/or the Kansas Constitution. But this flies in the face of the Kansas Constitution which places an affirmative constitutional obligation upon the Kansas Legislature to "make suitable provision for finance of the educational interests of the state." KAN. CONST., Art. 6; *Gannon I*, 298 Kan. at 1141-42, 1147. The State of Kansas is currently failing to comply with that obligation.

The positive, mandatory nature of Article 6 requires that the Kansas courts take action to remedy any constitutional violations. This concept of a positive duty is not a novel concept; it is inherent in the concept of "checks and balances" in the American system familiar to any civics student. Article 6's positive duty demands a remedy even if it means encroaching upon the Legislature's appropriations power. It comes as no surprise that the State – as it has in all stages of this litigation – continues to hide behind its Article 2 appropriations powers to justify its failure to comply with Article 6 of the Kansas Constitution. Yet, the State cannot use its Article 2 powers to violate Article 6 of the Kansas Constitution. Allowing the State to preserve the powers vested to the Legislature by Article 2 of the Constitution while wholeheartedly repudiating Article 6's commands regarding how that power must be exercised would give the Legislature absolute discretion regarding school funding. This would violate the very language of Article 6, which "communicates a clear intention not to give [the Legislature] absolute discretion in the finance of schools." Gannon 1, 298 Kan. at 1144 (emphasis added).

Plaintiffs do not seek to take away any of the Legislature's powers, including its power to appropriate. Although ordinarily it is not the Court's role to direct the Legislature how to appropriate, how to levy taxes, or how to spend the funds it collects, this case is the exception. The Kansas Constitution provides virtually no mandatory state programs or services, except for the education of Kansas public schoolchildren. The Legislature still has authority to determine how to provide that funding – if it deems a tax increase or restoration of taxes inappropriate to adequately fund education – it has the authority to make that decision. It does not, however, have the authority to fund education in a manner that does not comport with Article 6 of the Kansas Constitution. Nor does Governor Brownback have that authority. Article 6 represents the will of the people as enacted through the demanding constitutional amendment process. Passage of the education amendment required a two-thirds vote by both houses of the Kansas legislature and a majority vote of the people of Kansas. See KAN. CONST., Art. 14. The State seeks to thwart the will of the people based solely on a majority vote of the current Legislature in the exercise of its Article 2 appropriations power; this would allow the shifting whims of one or two legislators voting on a budget bill to outweigh the will of Kansans as enshrined in their properly amended Constitution. Such a result is untenable. As this Court previously held, "We conclude from this constitutional assignment of different roles to different entities that the people of Kansas wanted to ensure that the education of school children in their state is not entirely dependent upon political influence or the voters' constant vigilance." Gannon I, 298 Kan. at 1159 (emphasis added).

The rule of law requires that Article 6's constitutional mandates be upheld above all the shifting changes inherent in the democratic political process. As the Panel stated in its earlier

decision, and as quoted approvingly by this Court, "[m]atters intended for permanence are placed in constitutions for a reason – to protect them from the vagaries of politics or majority." *Gannon I*, 298 Kan. at 1159.

As the Panel and this Court have repeatedly found, the State has been derelict in fulfilling the positive duty imposed upon it by Article 6 of the Kansas Constitution. The State must now be held accountable and must be required to comply with the Kansas Constitution. As a result, it is within this Court's power to strike the provisions of CLASS and H.B. 2655 that would repeal the equalization formulas as they existed prior to January 1, 2015, order the Legislature to appropriate the necessary funding to ensure that equalization pay is paid pursuant to those formulas for fiscal years 2015, 2016, and 2017, and order the proper Executive Branch officials to disperse the resulting equalization funding pursuant to the prior formulas. To the extent the Legislature and/or the Executive Branch fails to comply with such an order, this Court has the inherent authority to apply sanctions for contempt.

Furthermore, if the Legislature and/or Executive Branch fail to comply with such an order, their actions will have created a conflict between Article 2 and Article 6 of the Kansas Constitution. It is this Court's duty to reconcile and read these provisions together; given the State's recalcitrance, Article 2's appropriations power must be made subservient to the positive duties regarding education funding imposed by the people of Kansas on their legislators through Article 6, Section 6. Article 6 demands that these violations be remedied – it demands that, if necessary, the Court exercise the appropriations power itself if the Legislature again fails to obey the Court's mandate.

## G. This Court Should Exercise Its Inherent Power to Issue Sanctions and Award Plaintiffs' Attorneys' Fees

In addition to the remedies discussed above, this Court has inherent power to sanction a party based on that party's conduct in bad faith, regardless of statutory provisions. See e.g., Schoenholz v. Hinzman, 295 Kan. 786, 787 (2012) (citing Alpha Med. Clinic v. Anderson, 280 Kan. 903, 926 (2006)) (courts have inherent powers to impose sanctions for bad-faith conduct, irrespective of statutory provisions). As Plaintiffs have shown, the State has acted in bad faith by continually dodging its constitutional obligation to properly fund education in Kansas. See Brief of Appellees, filed 9-1-15; Response Brief of Appellees, dated 1-12-16; R.Vol.14, p.1867 (Panel's 1/11/13 Order, p. 148 (the State acted with "what appears now to be an obvious and continuing pattern of disregard of constitutional funding obligations under Article 6")). The State's course of conduct since this Court's Gannon I decision has essentially amounted to willful disobedience leading to unnecessary expenditures by Plaintiffs in seeking to enforce this Court's (and the Panel's) decisions. First, the State "backtracked" on a promise to fully fund the equity formulas made to the Plaintiffs, the Panel, and Kansas schoolchildren and Plaintiffs were required to expend additional effort and funds to seek an order from the Panel altering its previous decision on equity, including extensive briefing and a two-day hearing. Then, after asking this Court for "one more chance" – and being granted another chance to comply – the State again failed to cure the affirmed inequities in the current system; instead making them worse. This Court should exercise its inherent power to sanction the State and award Plaintiffs' attorneys' fees.

Plaintiffs have repeatedly requested that this Court and the Panel enter attorneys' fees in their favor. A brief is currently pending before the Panel seeking this same relief. The brief

was filed on June 30, 2015, and the State certified that it was ready for ruling on August 5,

2015. Plaintiffs have repeatedly demonstrated that the State continues to act in bad faith. But,

even absent bad faith on the part of the State, attorneys' fees would be appropriate because

"plaintiffs have contributed to the vindication of important constitutional rights." Claremont

School Dist. v. Governor, 144 N.H. 590, 598, 761 A.2d 389 (1999). Under similar

circumstances, the Supreme Court of New Hampshire exercised its "inherent equitable powers"

and awarded reasonable attorney's fees to plaintiff school districts. Id. This Court should do

the same.

In contempt cases, courts routinely provide reasonable attorney's fees as a sanction.

While the grant of attorneys' fees in this case would admittedly be an extraordinary remedy, it

is no more extraordinary than the continued, willful defiance of the Legislature and its repeated

demonstrations of contempt for the people's Constitution.

**CONCLUSION** 

For reasons stated above, Plaintiffs request this Court: (1) find that H.B. 2655 does not

meet the Kansas Constitution's equity requirement for school funding; (2) select a remedy from

those discussed herein; (3) retain jurisdiction of this matter to ensure the State's compliance

with that remedy; and (4) award Plaintiffs attorneys' fees.

Dated this 25th day of April, 2016.

FROM: Dale M. Dennis, Deputy

Commissioner of Education

SUBJECT: 2016 Senate Bill 515

Attached is a computer printout (SF16-133) which summarizes the effects of a proposed plan on supplemental general (LOB) state aid, capital outlay state aid, and hold harmless state aid. Provisions of this bill include the following.

- Capital outlay state aid is the same as provided in House Bill 2731 (see computer printout SF16-117 for school district detail).
- Supplemental general (LOB) state aid using median assessed valuation per pupil (see computer printout SF16-126 for school district detail)

#### **SUMMARY—STATE AID**

Capital Outlay State Aid	\$ 23,	489,840
Supplemental General (LOB) State Aid	(82,9	08,792)
Hold Harmless State Aid	61,	792,947
Less Reduction in Extraordinary Needs	(2,3)	353,463)
Growth	2,	000,000
TOTAL	<b>\$</b> 2.	020 522
IUIAL	D 2,	020,532

# APPENDIX B: Chart Demonstrating Loss in LOB Equalization Due to Change in Methods (With Supporting Documentation)

## Loss in LOB Equalization Due to Change in Methods

# S Sub HB 2655 Reduces Equalization Aid and Increases the Equalization Gap

### Loss in LOB Equalization Due to Change in Methods

- 81.2 Percentile Method (see green line)
  - Brings each district up to the same purchasing power as the district at the **81.2 Percentile** of assessed valuation per pupil.
    - With a hypothetical 20 mill LOB levy, the districts receiving equalization could get about \$2,400 per pupil for LOB. Any LOB authority over or under that amount would cost more or less mills.
      - This \$2,400 per pupil would be funded partially locally, by the amount below the red line, and partially by a state equalization payment, the amount above the red line to the green line.
  - Would provide equalization funding to 232 districts.
  - This was the Court's safe harbor.
- Median Method (see blue line)
  - Projected effect on 2016-17 funding would bring each district up to the same purchasing power as the district at the **68.8 Percentile** of assessed valuation per pupil.
    - With a 20 mill LOB levy the districts receiving equalization could get about \$1,950 per pupil for LOB. Any LOB authority over or under that amount would cost more or less mills.
      - The \$1,950 per pupil would be funded partially locally, by the amount below the red line, and now, to a lesser extent, by a state equalization payment, the amount above the red line to the blue line.
  - Would provide equalization to 197 districts.
  - 35 districts lose equalization that would have been received under the prior system.
  - 232 districts would receive less equalization than under the 81.2 Percentile Method.
- The Median Method is a DECREASE in equalization from the prior system.
- The yellow area is the amount of the loss.

Commissioner of Education

SUBJECT: Supplemental General (LOB) State Aid - Comparing the Block Grant Law

with the School Finance Law Prior to 2014-15 Using Median Assessed

Valuation Per Pupil

Attached is a computer printout (SF16-126) which compares the supplemental general (local option budget) state aid under the block grant law with the school finance law prior to the 2014-15 school year using the median assessed valuation per pupil.

Below we have provided a brief explanation for funding LOB in FY 2016 and FY 2017.

#### Fiscal Year 2016

The LOB portion will require approximately \$501,126,214. The amount of the appropriation in the block grant is \$450,500,000. In order to return to the law prior to 2014-15, it would require an additional \$50,626.214.

#### Fiscal Year 2017

Under the law prior to 2014-15, \$367,582,721 would be required for LOB state aid using the median assessed valuation per pupil. The reason for the reduction is the old law was based upon 81.2 percentile and this plan is based upon the median assessed valuation per pupil. The amount of the appropriation is \$450,500,000. This plan would reduce the LOB state aid by \$82,908,792. The total additional requirement is estimated to be \$367,591,208.

	Fiscal Year 2016	Fiscal Year 2017*
Current appropriation amount needed	501,126,214	(82,908,792)
LOB Appropriation	450,500,000	450,500,000
	50,626,214	367,591,208
Growth		0
		367,591,208

<sup>\*</sup>Estimate

Listed below is a column explanation of the attached printout (SF16-126).

#### **COLUMN EXPLANATION**

- Column 1 -- September 20, 2015 Estimated FTE enrollment
  - 2 -- 2016-17 Estimated supplemental general (local option budget) state aid under the current law (block grant)
  - 3 -- 2016-17 Estimated supplemental general (local option budget) state aid under the school finance law prior to the 2014-15 school year using the median assessed valuation per pupil

## APPENDIX C: 2015-16 Mill Rates Report

# MILL RATES

2015 - 2016

**Kansas Public School Districts** 

Introduction \_\_\_\_

This publication has been prepared by the School Finance section of the Kansas State

Department of Education to provide mill rate data for each of the unified school districts
in Kansas.

Due to the state school finance law, as amended, all general fund mill rates are set at 20.00 mills. The recreation commission mill rate has been moved out of the USD total mill rate since it is not a true school levy.

It is hoped that this report will be beneficial to school boards, school administrators, and others who may be interested in the educational programs of local public school districts.

Please visit the School Finance section of the Kansas Department of Education website at <a href="https://www.ksde.org">www.ksde.org</a> for more publications or additional information.

Dale M. Dennis
Deputy Commissioner
Kansas State Department of Education

Craig Neuenswander, Director School Finance Division of Fiscal and Administrative Services Kansas State Department of Education

Mill Rates For Kansas Public Schools	1

## School districts are authorized to levy property taxes for selected funds. These funds are listed below:

Recreation commission employee benefits and special liability (KSA 12-1928 / 75-6110)

- o General (KSA 72-6431)
- Supplemental General (KSA 72-6435)
- o Capital Outlay (KSA 72-8801)
- o Bond and interest #1 (KSA 10-113)
- o Bond and interest #2 (KSA 10-113)
- No fund warrant (KSA 79-2939)
- Special assessment (KSA 12-6a10)
- o Temporary note (KSA 72-8203b)
- Historical museum (KSA 12-1684)

- Public library board (KSA 72-1623a)
- Public library board emp benefits (KSA 12-16,102)
- Adult education (KSA 72-4523)
- Judgments (KSA 72-8209)
- Special liability expense (KSA 75-6110)
- School retirement (KSA 72-1726)
- Extraordinary growth facility (KSA 72-6441)
- Recreation commission (KSA 12-1927)

Property taxes for these funds are computed using a mill rate. This is a mathematical procedure to How are mill levies computed?

determine property taxes. One mill is one dollar of property tax levied against \$1,000 of assessed valuation. The assessed valuation is computed by taking the market value of the property and multiplying it by the appropriate assessment factor for that class of property.

The following example for a \$100,000 house is used to show how property taxes are computed. A school district has a total mill rate of 50. Of this 50 mills, the general fund is 20 mills (by statute), leaving 30 mills for the other fund levies. For general fund only, the first \$20,000 is subtracted from the market value of the house to arrive at the assessed valuation of the house. For example, a house with a market value of \$100,000 would be reduced to \$80,000 (\$100,000-\$20,000 exemption) for general fund only. The \$80,000 is multiplied by the assessment rate of 11.5% to arrive at an assessed valuation of \$9,200. (\$80,000 x 11.5% = \$9,200). The \$9,200 is multiplied by .020 (20 mills) to arrive at the property taxes for the general fund of \$184. For the rest of the levy funds .030 (30 mills) is taken times the assessed valuation of \$11,500 (\$100,000 x 11.5% = \$11,500) to arrive at the property tax of \$345. By adding the two amounts of \$345 plus \$184, the result is a total school district property tax of \$529 for this example.

If you have questions, contact School Finance 785-296-3872

Another example for a \$125,000 house is shown below:

(\$12,075 x .020)

**Property Tax Calculation** 

(\$14,375 x .013)

	<b>General Fund</b>	All Other Funds
Market Value of House	\$125,000	\$125,000
\$20,000 Exemption	- 20,000	
Net Value of House	\$105,000	\$125,000
Assessment Factor for Homes	x 11.5%	x 11.5%
Assessed Valuation	\$ 12,075	\$ 14,375
Mill Rate	20 mills	13 mills
Property Tax	\$ 241.50	\$ 186.88

Total School Property Taxes = \$428.38 (General Fund plus all other funds)

For additional MILL RATE information on the web, go to: <a href="http://www.ksde.org/Default.aspx?tabid=415">http://www.ksde.org/Default.aspx?tabid=415</a>

Select Mill Rates to access data for each district - reports available 2009-10 through 2015-2016.

**Note:** Market value and assessed value of farm land is different for each type of property and can be obtained from your local County Assessor's Office.

## **Column Definitions**

#### General

This is for the general operating fund. The school finance law mandates 20 mills per district.

### Supp General

This is the rate for the Supplemental General (LOB) fund.

### Capital Outlay

This is the rate for the Capital Outlay fund.

## Bond & Interest

This is the rate for the Bond & Interest fund.

### Ancillary

This is a rate authorized by the State Court of Tax Appeals for extraordinary growth in enrollment.

## Declining Enrollment

This is a rate authorized by the State Court of Tax Appeals for declining enrollment.

## Cost of Living

This is a rate authorized by the State Court of Tax Appeals for cost of living.

#### USD Total Actual Mill Rates

This includes all mill rates from the General, Supplemental General, Adult Education, Capital Outlay, Bond & Interest, Extraordinary Growth (Ancillary), Declining Enrollment, Cost of Living, Special Liability, School Retirement, No Fund Warrant, Special Assessment, and Temporary Note.

#### Total Other Actual Rates

This includes taxes levied by the school district on behalf of other entities, such as the Historical Museum, Public Library, and Recreation Commission.

## **State Totals**

## USD Total Mill Rates (Includes Historical Museum and Public Library for years prior to 2011-2012)

	2009-10	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16

# APPENDIX D: Charts Demonstrating Effects of H.B. 2655 (With Supporting Documentation)

# Effects of S Sub HB 2655 New Formula and Hold Harmless Aid U.S.D. 259 Wichita

**LOB STATE AID** 

**CAPITAL OUTLAY STATE AID** 

## S Sub HB 2655 Simply Renames Existing Money

## <u>Understanding the Effects of S Sub HB 2655 New Formula and Hold Harmless Aid U.S.D. 259 Wichita</u>

#### Step 1: LOB Equalization:

- Under the 81.2 Percentile Formula Wichita would have received \$60,181,021 in LOB equalization aid (large green bar).
- Under the SB7 Block Grants, Wichita's frozen equalization aid at the prorated FY15 amount is \$55,048,212 (large yellow bar).
  - This is \$5,132,809 less than the LOB equalization formula approved by the Court.
- The S Sub HB 2655 Median formula provides Wichita even less equalization aid than the block grant at \$49,002,565 (large red bar).
  - This is \$6,045,648 <u>less</u> than prorated and frozen by the block grants.
  - This is \$11,178,457 less than the aid under the 81.2 percentile formula.

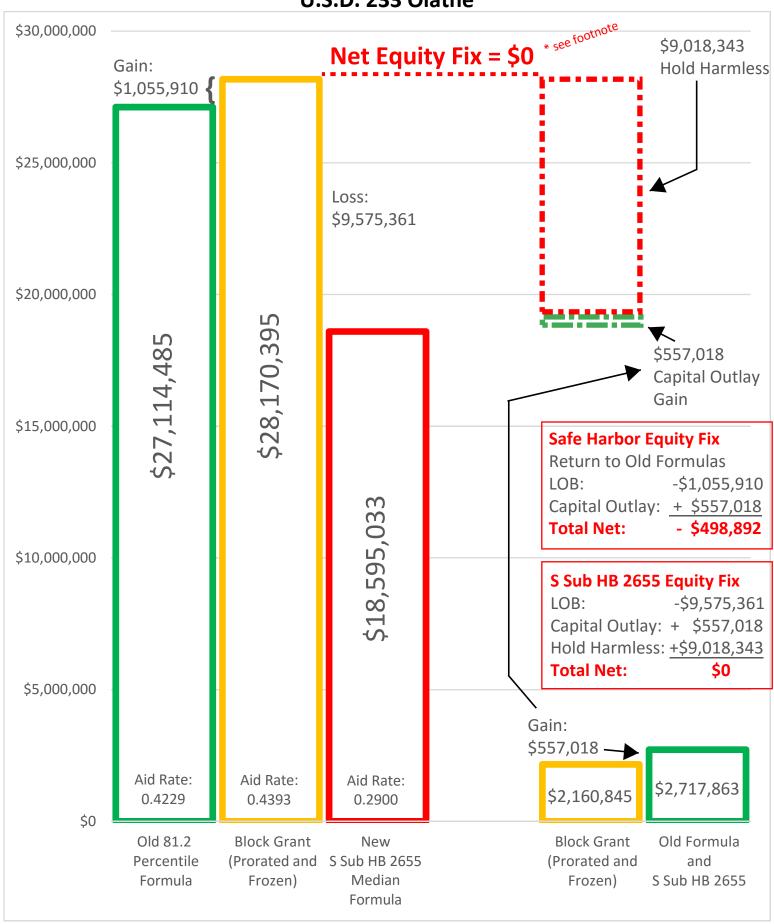

### Step 2: Capital Outlay Equalization:

- Under the SB7 Block Grants, Wichita's frozen equalization aid at the prorated FY15 amount is \$4,559,453 (small yellow bar).
  - This is \$4,508,756 <u>less</u> than the LOB equalization formula approved by the Court.
- The prior formula is restored under S Sub HB 2655 and Wichita receives \$4,508,756 additional state aid for a total of \$9,068,209 (small green bar).

### Step 3: Hold Harmless (New "School District Equalization State Aid")

- This is calculated by adding Wichita's loss of \$6,045,648 in LOB equalization to their gain in Capital Outlay equalization of \$4,508,756 (green dotted bar). The difference of \$1,536,892 is their hold harmless aid (red dotted bar). This brings them back up to the same state aid they had under SB7.
- This calculation completely nullifies the gain in Capital Outlay State Aid for most districts.
- It results in no change in overall equalization aid for the overwhelming majority of districts.
- Its intended effect is only to <u>equalize all districts to the block grant amount</u>, regardless whether the district became wealthier or poorer in relation to the other districts.
- It does not lesson wealth based disparities between districts, the stated goal of equalization.

# Effects of S Sub HB 2655 New Formula and Hold Harmless Aid U.S.D. 233 Olathe

\_ \_\_.

**LOB STATE AID** 

**CAPITAL OUTLAY STATE AID** 

## S Sub HB 2655 Simply Renames Existing Money

## <u>Understanding the Effects of S Sub HB 2655 New Formula and Hold Harmless Aid</u> U.S.D. 233 Olathe

### Step 1: LOB Equalization:

- Under the 81.2 Percentile Formula Olathe would have received \$27,114,485 in LOB equalization aid (large green bar).
- Under the SB7 Block Grants, Olathe's frozen equalization aid at the prorated FY15 amount is \$28,170,395 (large yellow bar).
  - This is \$1,055,910 more than the LOB equalization formula approved by the Court.
- The S Sub HB 2655 Median formula provides Olathe even less equalization aid than the block grant at \$18,595,033 (large red bar).
  - This is \$9,575,361 <u>less</u> than prorated and frozen by the block grants.
  - This is \$8,519,452 less than the aid under the 81.2 percentile formula.

## Step 2: Capital Outlay Equalization:

- Under the SB7 Block Grants, Olathe's frozen equalization aid at the prorated FY15 amount is \$2,160,845 (small yellow bar).
  - This is \$557,018 <u>less</u> than the LOB equalization formula approved by the Court.
- The prior formula is restored under S Sub HB 2655 and Olathe receives \$557,018 additional state aid for a total of \$2,717,863 (small green bar).

### Step 3: Hold Harmless (New "School District Equalization State Aid")

- This is calculated by adding Olathe's loss of \$9,575,361 in LOB equalization to their gain in Capital Outlay equalization of \$557,018 (green dotted bar). The difference of \$9,018,343 is their hold harmless aid (red dotted bar). This brings them back up to the same state aid they had under SB7.
- This calculation completely nullifies the gain in Capital Outlay State Aid for most districts.
- It results in no change in overall equalization aid for the overwhelming majority of districts.
- Its intended effect is only to <u>equalize all districts to the block grant amount</u>, regardless whether the district became wealthier or poorer in relation to the other districts.
- It does not lesson wealth based disparities between districts, the stated goal of equalization.

#### \*The Net Equity Fix is Zero for 263 districts.

Why do 23 districts have a positive Net Equity Fix and receive increased funding under S Sub HB 2655 for a total of \$2,373,994?

- The block grants froze Capital Outlay State Aid at a (recalculated and) prorated amount and so almost all districts that receive equalization will receive increased Capital Outlay State Aid with the return to the prior median method formula. In fact, several of these 23 districts were receiving no capital outlay aid at all under SB7 so a return to the formula takes additional amounts.
- Despite the *decrease* this year in the 81.2 percentile, the Median AVPP *increased* from \$68,634 to \$74,129. This further shifted equalization upward for Capital Outlay State Aid under the median method. Thus the Capital Outlay Aid Rate under the median formula has also increased for many districts, including all 23 of these districts.
- Several of these districts increased their Capital Outlay Mill Levy, and will now get equalization funding on those additional mills over what was frozen into the block grants.
- Several of these districts had significant *decreases* in AVPP, which, in turn, significantly *increased* their need for equalization over the amount of State Aid for LOB and Capital Outlay that was frozen into the block grants.
- Two of these districts increased their LOB after the block grant equalization was frozen in and now will get equalization on the increased LOB funds.
- The additional \$2.4M is not new money. It comes as a result of a reduction of extraordinary needs aid. See S Sub HB 2655 Sec. 1(d).

March 21, 2016

FROM: Dale M. Dennis, Deputy

Commissioner of Education

SUBJECT: Capital Outlay State Aid - Comparing the Block Grant Law

with the School Finance Law Prior to 2014-15

Attached is a computer printout (SF16-117) which compares the capital outlay state aid under the block grant law with the school finance law prior to the 2014-15 school year.

Below we have provided a brief explanation for funding capital outlay in FY16 and FY17.

#### Fiscal Year 2016

The capital outlay portion will require approximately \$47,646,355 and the amount appropriated is \$27,302,500. The difference of \$20,343,855 is the amount that would be required to fund the law prior to 2014-15.

### Fiscal Year 2017

Capital outlay aid is estimated to be \$50,780,296 and the amount appropriated is \$27,302,500. This results in an increase of \$23,477,796. The capital outlay mill levies could change as a result of tight budgets. Therefore, we have allowed \$2,000,000 to cover such changes for a total additional requirement of \$25,477,796.

	Fiscal Year 2016	Fiscal Year 2017*
Current appropriation amount needed	47,646,355	50,780,296
Capital Outlay Appropriation	27,302,500	27,302,500
	20,343,855	23,477,796
Potential Change in Mill Rate		2,000,000
		25,477,796

<sup>\*</sup>Estimate

Listed below is a column explanation of the attached printout SF16-117.

## **COLUMN EXPLANATION**

- Column 1 -- September 20, 2015 Estimated FTE enrollment
  - 2 -- 2016-17 Estimated capital outlay state aid under the current law (block grant)
  - 3 -- 2016-17 Estimated capital outlay state aid under the school finance law prior to the 2014-15 school year
  - 4 -- Difference

FROM: Dale M. Dennis, Deputy

Commissioner of Education

SUBJECT: Supplemental General (LOB) State Aid - Comparing the Block Grant Law

with the School Finance Law Prior to 2014-15

Attached is a computer printout (SF16-116) which compares the supplemental general (local option budget) state aid under the block grant law with the school finance law prior to the 2014-15 school year.

It is important to note that the 81.2% adjusted assessed valuation per pupil changes each year and in the 2015-16 school year declined as a result of gas and oil.

Below we have provided a brief explanation for funding LOB in FY 2016 and FY 2017.

## Fiscal Year 2016

The LOB portion will require approximately \$501,126,214. The amount of the appropriation in the block grant is \$450,500,000. In order to return to the law prior to 2014-15, it would require an additional \$50,626.214.

#### Fiscal Year 2017

Under the law prior to 2014-15, \$465,003,991 would be required for LOB state aid. The reason for the reduction is due to the 81.2 percentile declining from 123,689 to 119,287 assessed valuation per pupil. The amount of the appropriation is \$450,500,000. The difference of \$14,503,991 is the additional amount of state aid required. In addition, there are potential changes in assessed valuation for the current year which would affect 2017. We have allowed \$1,000,000 for these potential changes. The total additional requirement is estimated to be \$15,503,991.

	Fiscal Year 2016	Fiscal Year 2017*
Current appropriation amount needed	501,126,214	465,003,991
LOB Appropriation	450,500,000	450,500,000
	50,626,214	14,503,991
Potential Change in Assessed Valuation		1,000,000
		15,503,991

<sup>\*</sup>Estimate

Listed below is a column explanation of the attached printout (SF16-116).

## **COLUMN EXPLANATION**

- Column 1 -- September 20, 2015 Estimated FTE enrollment
  - 2 -- 2016-17 Estimated supplemental general (local option budget) state aid under the current law (block grant)
  - 3 -- 2016-17 Estimated supplemental general (local option budget) state aid under the school finance law prior to the 2014-15 school year
  - 4 -- Difference

APPENDIX G:
Assessed Valuation Per Pupil Chart
(With Supporting Documentation)

## **Assessed Valuation Per Pupil**

## Without Equalization, Districts Raise Vastly Different Amounts of Resources.

- Assessed valuation varies significantly from district to district.
- The poorest districts are Ft. Leavenworth with an AVPP of \$1,550 and Galena with an AVPP of \$21,928.
  - Note:
    - Ft. Leavenworth is an outlier. Galena is the practical lowest.
    - The unconstitutional capital outlay formula in SB 7 was keyed off of Ft. Leavenworth to make it less expensive.
- The median AVPP is \$74,129.
- The wealthiest district has an AVPP of \$547,862.
- This means one mill of tax effort raises vastly differing amounts of funding.
- This means that any locally based funding like LOB and Capital Outlay is harder to raise in some districts and easier in others.
- The purpose of equalization is to lessen the disparity in purchasing power due to district wealth.
- Equalization funding from the state is necessary for students in the poorer districts to have reasonably equal access to substantially similar educational opportunity through similar tax effort.

APPENDIX H:

Exerpts from Plaintiffs' Motion for Summary Judgment and Declaratory Judgment,
filed in Petrella, et. al v. Brownback, et al.

### UNITED STATES DISTRICT COURT FOR THE DISTRICT OF KANSAS

DIANE PETRELLA, et al.,

Plaintiffs.

VS.

Case No. 10-CV-2661-JWL-KGG

SAM Brownback, Governor of Kansas, in his official capacity; *et al.*,

Defendants.

### MEMORANDUM IN SUPPORT OF PLAINTIFFS' MOTION FOR SUMMARY JUDGMENT AND DECLARATORY JUDGMENT

Tristan L. Duncan, D.Kan. #70481 Zach Chaffee-McClure, Kan. #23479 William F. Northrip, D. Kan. # 78390 SHOOK HARDY & BACON, LLP 2555 Grand Boulevard Kansas City, Missouri 64108-2613 Jonathan S. Massey MASSEY & GAIL, LLP 1325 G St. N.W., Suite 500 Washington, DC 20005 Laurence H. Tribe Hauser Hall 420 1575 Massachusetts Ave. Cambridge, MA 02138

#### **ATTORNEYS FOR PLAINTIFFS**

- 20. The SMSD LOB is at the maximum level set by the SDFQPA. (Ex. 8A, Trouvé Aff. at ¶ 5.a; Ex. 8B, Petrella Aff. at ¶ 7.a; Ex. 5AX at 1, 2013 SMSD Legislative Platform; Ex. 1H, Kansas State Dept. of Ed. Letter of June 21, 2012 at 2 (showing SMSD is at the maximum authorized LOB of 31%)).
- 21. Every request submitted to SMSD voters seeking local tax increases for local public education has passed without objection. (Ex. 6A, 6B, Johnson County Election Office Records regarding voting results related to local funding for public education).

#### **QUESTIONS PRESENTED**

- 1. Does Kansas deprive Plaintiffs of Equal Protection of the Laws under the Fourteenth Amendment of the United States Constitution by virtue of the State's unequal per-pupil funding of Plaintiffs' public education, coupled with the Spending Cap's statutory prohibition on raising more money locally to compensate for the State's unequal treatment, which prevents Plaintiffs from even attempting to level the playing field?
- 2. Does the Spending Cap, which prevents citizens residing in school districts from deciding collectively to raise local taxes to support their public schools and remedy educational deficiencies caused by unequal funding provided by the state, violate Plaintiffs' rights under the First Amendment and the Due Process Clause of the Fourteenth Amendment to the United States Constitution?

Although not a material fact for purposes of this motion, in recent 2013 elections many school bond issues were passed across the State, a result supporting the view, also held by Plaintiffs, that "Kansas voters are more willing than their elected representatives in Topeka to invest tax dollars in public schools." Peter Hancock, Lawrence Journal World "School bond issues have been popular in recent Kansas elections" (Apr. 3, 2013) <a href="http://www2.ljworld.com/weblogs/first-bell/2013/apr/3/school-bond-issues-have-been-popular-in-/">http://www2.ljworld.com/weblogs/first-bell/2013/apr/3/school-bond-issues-have-been-popular-in-/</a>

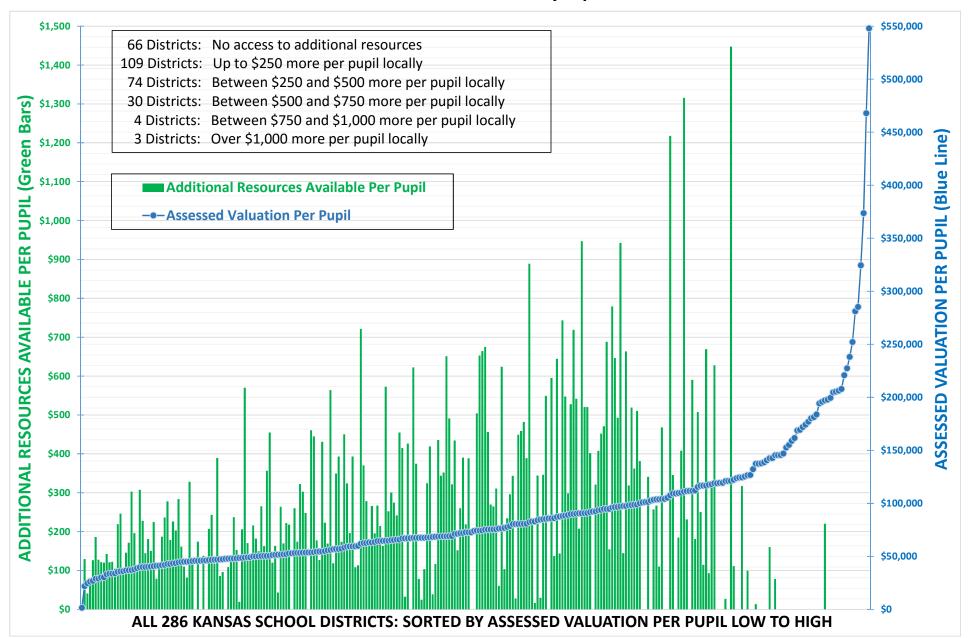

Although also not a material fact for purposes of this motion, it may be noteworthy that the school finance scheme disproportionately requires SMSD residents to send a significantly higher percentage of school tax revenue to the State for redistribution to other school districts than SMSD gets back from the State for their own children. The District recently reported in its legislative platform that "For every \$1 Johnson County taxpayers send to Topeka, 34.5 cents are returned for school operations." "Financial Crisis Tops Shawnee Mission District's Legislative Platform," PV Post, Dan Blom, Pct. 25, 2012.

### SUMMARY OF ELECTION RESULTS ON ISSUES BROUGHT BY SMSD #512 AND JOHNSON COUNTY REGARDING SCHOOL FUNDING

August	JOCO	Shall Board of county commissioner impose additional	Yes 61.22%
2002		<sup>1</sup> / <sub>4</sub> of one cent countywide retailers' sales tax in JOCO to	No 38.78%
		end on 12/31/05 with revenue to be distributed as	
		required by law, 64% to the county and 36% to the	
		cities of JOCO and the county to share to be used to	
		fund and aware economic development and public	
		benefit grants to public school districts located in JOCO	
		to be used to maintain educational opportunities for	
		technology, special education and other purposes	
		authorized by state law?	
April	SMSD	Shall USD 512 issues general obligation bonds not to	Yes 68.23%
2004	512	exceed \$184,000,000 for purpose of acquiring,	No 31.77%
		constructing, equipping, furnishing, repairing,	
		remodeling and making additions to bldgs and facilities	
		used for school district purposes	
September	JOCO	Special Polls election	Yes: 71.40%
2005		Shall Board of County Commissioners renew and	No: 28.60%
		continue to impose for an additional 3 years ending	
		12/31/08 the ¼ of one cent countywide retailers' sales	
		tax	
April	SMSD	Shall the SMSD BOE be authorized to increase it local	Yes: 65.09%
2007	512	option budget for 2007-2008 school year by additional	No: 34.91%
		1% of its state financial aid to be continuously and	
		permanently authorized to adopt a local option budget,	
		for the 2007-2008 school year for each school year	
		thereafter in an amount not to exceed 31% of the	
		amount of state financial aid determined for the current	
		school year, for the purpose of using the additional local	
		option budget authority for student instruction?	

# APPENDIX I: Chart Demonstrating Unequal Additional Resources Available (With Supporting Documentation)

## S Sub HB 2655 Increases the Equity Gap by Providing Unequal Access to Unequal Amounts of Resources.

- S Sub HB 2655 decreases the state aid to LOB.
- The hold harmless funding is not classified as LOB funding, but goes to the general fund.
- Districts still have the authority to raise their full legal LOB budget as frozen under the block grants.
- Without the full state equalization, districts receiving a cut in aid haven't fully funded their LOB budget.
- This allows any district with a decrease in LOB State Aid to increase their local LOB mill levy to backfill their LOB budget.
- So the amount of the decrease in state aid for LOB becomes additional funding that the district can raise locally.
- The additional funding is purely local. There is no equalization for these additional resources.
- This amount varies significantly across districts.
- Districts with this access to additional resources have not demonstrated a need that other districts haven't.
- The amount is not a calculation of a need by those districts, but simply the arbitrary amount of the cut in equalization.
- Districts with a larger cut in equalization have access to a larger amount of additional resources.
- Districts with a smaller cut in equalization have access to a smaller amount of additional resources.
- Districts with no cut in equalization have no access to additional resources.
- This chart shows the per pupil amount of the additional resources available (green bars) along with each district's assessed valuation per pupil (blue line).
  - 66 districts have no access to additional resources
  - 109 districts can raise up to \$250 more per pupil locally
  - 74 districts can raise between \$250 and \$500 more per pupil locally
  - 30 districts can raise between \$500 and \$750 more per pupil locally
  - 4 districts can raise between \$750 and \$1,000 more per pupil locally
  - 3 districts can raise more than \$1,000 more per pupil locally
- Conclusion: S Sub HB 2655 increases the equity gap by providing unequal access to unequal amounts of resources.

District Count:						
No Additional Resources Available	66 Districts					
Up to \$250 in Additional Resources Available Per Pupil	109 Districts					
\$250 to \$500 in Additional Resources Available Per Pupil	74 Districts					
\$500 to \$750 in Additional Resources Available Per Pupil	30 Districts					
\$750 to \$1000 in Additional Resources Available Per Pupil	4 Districts					
Over \$1,000 Additional Resources Available Per Pupil	3 Districts

# APPENDIX J: Chart Demonstrating Mills Required to Access Additional Resources (With Supporting Documentation)

### Poor and Wealthy Districts Don't Have Equal Access to the Additional Local Resources Through Similar Tax Effort.

- Districts receiving a cut to equalization under S Sub HB 2666 can raise these additional LOB dollars locally up to the amount of the aid that was cut.
- There is no equalization on these amounts.
- Because a mill in a wealthier district raises much more funding than a mill in a poorer district, the local tax effort varies greatly between districts.
- For example:
  - <u>U.S.D. 499 Galena</u> (AVPP \$21,928)
    - They have access to additional funding of \$102,278, or **\$129 per pupil**.
    - This requires increasing their mill levy by **5.9 mills** to access those additional funds.
  - <u>U.S.D. 500 Kansas City</u> (AVPP \$33,671)
    - They have access to additional funding of \$2,502,864, or \$123 per pupil.
    - This requires increasing their mill levy by **3.6 mills** to access those additional funds.

#### U.S.D. 231 Gardner Edgerton (AVPP \$47,961)

- They have access to additional funding of \$706,254, or \$129 per pupil.
- This requires increasing their mill levy by **2.7 mills** to access those additional funds.
- U.S.D. 229 Blue Valley (AVPP \$122,209)
  - They have access to additional funding of \$2,407,372, or \$111 per pupil.
  - This requires increasing their mill levy by **0.9 mills** to access those additional funds.
- U.S.D. 344 Pleasanton (AVPP \$48,837)
  - They have access to additional funding of \$192,875, or \$570 per pupil.
  - This requires increasing their mill levy by **11.7 mills** to access those additional funds.
- U.S.D. 346 Jayhawk (AVPP \$107,651)
  - They have access to additional funding of \$660,809, or \$1,218 per pupil.
  - This requires increasing their mill levy by **11.3 mills** to access those additional funds.
- Conclusion: Poor and Wealthy Districts Don't Have Equal Access to the Additional Local Resources Through Similar Tax Effort.

#### No. 15-113,267-S

### In the Supreme Court of the State of Kansas

Luke Gannon, et al., Plaintiffs-Appellees,

v.

**State of Kansas**, *et al.*, Defendants-Appellants.

Appeal From Appointed Panel Presiding in the District Court of Shawnee County, Kansas

> Honorable Franklin R. Theis Honorable Robert J. Fleming Honorable Jack L. Burr

District Court Case No. 10C001569

#### BRIEF OF APPELLANT CONCERNING LEGISLATIVE CURE

Stephen R. McAllister, KS Sup. Ct. No. 15845 Solicitor General of Kansas Memorial Bldg., 2nd Floor 120 SW 10th Avenue Topeka, Kansas 66612-1597 Telephone: (785) 296-2215 Fax: (785) 291-3767 steve.mcallister@trqlaw.com Counsel for Appellant State of Kansas

Oral Argument: One Hour

### TABLE OF CONTENTS

F	age
NATURE OF THE CASE	1
Gannon v. State, Kan, No. 113,267 (Feb. 11, 2016)	1
Gannon v. State, 298 Kan. 1107, 319 P.3d 1196 (2014)	1
STATEMENT OF THE ISSUES	2
STATEMENT OF FACTS	3
Gannon v. State, Kan, No. 113,267 (Feb. 11, 2016)	3, 4
K.S.A. 2014 Supp. 72-8814	6, 7
K.S.A. 2014 Supp. 75-2319	6
K.S.A. 2014 Supp. 72-6434	6
ARGUMENT	11
I. HB 2655 Cures Any Capital Outlay Inequities by Restoring and Fully Funding the Previous Capital Outlay Equalization Formula Which This Court Already Has Declared to be Constitutional.	13
Gannon v. State, Kan, No. 113,267 (Feb. 11, 2016)	13
K.S.A. 2014 Supp. 72-8814	13
II. HB 2655 Cures Any LOB Inequities by Adopting and Fully Funding for LOB Equalization Aid the Same Formula This Court Previously Approved as Constitutionally Equitable for Capital Outlay Equalization Aid.	14
A. The Legislature had a reasoned and considered basis for altering the old LOB equalization formula.	14
Gannon v. State, Kan, No. 113,267 (Feb. 11, 2016)	14
B. The Legislature considered precise mathematical evidence which demonstrated that adopting the capital outlay equalization formula for LOB equalization would reduce disparities more than retaining the old LOB formula.	15

About the Bill and Is Both Necessary and Appropriate	18
Gannon v. State, Kan, No. 113,267 (Feb. 11, 2016)	18
IV. HB 2655, At a Minimum, Substantially Complies with This Court's Gannon I & II Directives. If This Court Nonetheless Determines that a Remedy Is Required, the Correct Remedy Would Be to Sever Any Unconstitutional Provisions in the Most Narrow and Targeted Way Necessary to Eliminate the Constitutional Violation. Ordering that Kansas Schools Be Shut Down Is Neither a Necessary nor a Judicially Proper Remedy.	20

CONCLUSION	23

#### NATURE OF THE CASE

This Court's February 11, 2016, Opinion ("Gannon II") reiterated that the unconstitutional inequities identified by the Court "can be cured in a variety of ways—at the choice of the legislature." Slip op. at 73 (quoting Gannon v. State, 298 Kan. 1107, 1181, 1188-89, 319 P.3d 1196 (2014) ("Gannon I")). The Legislature took the Court's guidance to heart, first seriously considering whether to restore the old equity funding system, the precise details of which were never constitutionally mandated. When simply reverting to all of the old formulas failed to gain support, the Legislature considered other approaches, all with the predominant goal in mind of creating a constitutionally equitable system of school finance.

Ultimately, after substantial hearings, the presentation of expert testimony, and the careful consideration of neutral, thoughtful, and detailed analyses of various potential options, the Legislature reached consensus on the approach represented by the law now before this Court. Specifically, the Legislature chose to cure the inequities this Court identified by passing 2016 Senate Substitute for House Bill 2655 ("HB 2655"), a law which—by any measure—provides school districts reasonably equal access to substantially similar educational opportunity through similar tax effort. A copy of HB 2655 is included as Appendix A to the State's Notice of Legislative Cure (April 7, 2016).

The bases for the Legislature's determination that HB 2655 complies with Article 6 of the Kansas Constitution are thoroughly documented in the extensive legislative record of the proceedings, including testimony and mathematical analyses, which has been provided to the Court as Appendix B ("App. B") to the State's Notice.

The Legislature's good-faith, careful, reasoned and well-documented determination should be given substantial deference.

Given the Legislature's considered and attentive response to the Court's decision in *Gannon II*, the Article 6 equity requirement now has been satisfied. Even if the Court were to somehow find that HB 2655 does not cure completely the previously found inequities, HB 2655 contains an explicit *severability* clause that would allow this Court to sever any unconstitutional provisions rather than enjoining all school funding. Thus, in the unlikely event the Court finds that HB 2655 still has not satisfied the Article 6 equity requirement, there is absolutely no reason any appropriate and proper judicial remedy would include closing Kansas public schools.

### STATEMENT OF THE ISSUES

- 1. Did the Legislature cure the unconstitutional capital outlay inequities when it restored and fully funded the previous capital outlay equalization formula, something this Court called an "obvious" solution?
- Did the Legislature cure the unconstitutional local option budget (LOB) inequities by applying the formula this Court approved for capital outlay equalization to LOB equalization, particularly when evidence before the Legislature demonstrated that this action would reduce significantly any existing wealthbased disparities?
- 3. If for some reason this Court concludes that the capital outlay or LOB inequities have not been cured, is the proper remedy to rely on the severability clause in HB 2655 to sever any unconstitutional provisions rather than taking the unprecedented action of closing the public schools by judicial decree?

### STATEMENT OF FACTS

After this Court's decision in *Gannon II*, the Legislature began studying ways to cure the unconstitutional inequities the Court identified. In *Gannon II*, this Court instructed: "One obvious way the legislature could comply with Article 6 would be to revive the relevant portions of the previous school funding system and fully fund them within the current block grant system." Slip op. at 73. Initially, two bills, HB 2731 and SB 512, were introduced in the Legislature to take that very approach. *See*, *e.g.*, App. B at 60, 70-71, 168-69, 172 (testimony of Kansas Education Commissioner Dr. Randy Watson and Dale Dennis, Deputy Commissioner of Education for Fiscal and Administrative Services, that HB 2731 and SB 512 would restore the previous equalization formulas).

But when hearings were held on HB 2731 and SB 512, no one showed up to testify as a proponent, nor did any person or any organization (including the Plaintiff Districts) even provide written proponent testimony in support of that approach. See App. B at 92, 94-95. The bills also failed to gain political support within the Legislature. The HB 2731 proposal never made it out of the House Appropriations Committee. HB 2731, http://www.kslegislature.org/li/b2015\_16/measures/hb2731/. When SB 512 reached the Senate floor, the Senate voted to send it back to the Ways and Means Committee. 2015of 16 Journal the Senate at 2157 (March 21, 2016). available at http://www.kslegislature.org/li/b2015\_16/chamber/documents/daily\_journal\_senate\_ 20160321185858.pdf.

-

<sup>&</sup>lt;sup>1</sup> The relevant committee minutes have not yet been finalized and approved. The State will provide those minutes to thr Court as soon as they become available.

A major reason these bills failed to gain traction was that restoring the previous equalization formulas would have had the effect of significantly cutting overall state aid for numerous districts. As Commissioner of Education Dr. Randy Watson testified, the bills would have created "some real hardships with the number of districts that will lose funding." App. B at 175. These hardships were by no means limited to "wealthy" districts; a number of districts with low Assessed Valuation Per Pupil (AVPP) would have suffered reduced funding. For instance, U.S.D. No. 234 (Fort Scott)—which is ranked 255 out of 286 districts in terms of AVPP—would have lost \$112,514 in LOB aid and \$28,319 in capital outlay aid. *Id.* at 256, 261. There also was concern that the LOB aid in the proposed bills was inflexible, in the sense that it could be used only to reduce LOB mill levies (*i.e.*, provide tax relief) and would never make it to the classroom. *See id.* at 340, 381, 625.

Given the lack of support for HB 2731 and SB 512, and this Court's admonition in *Gannon II* that "the State would help its case by showing its work in how it determined that any other proposed [equity] solution complies with *Gannon I*," slip op. at 74, the Legislature convened a meeting of the Joint Legislative Budget Committee for the purpose of gathering information and evaluating possible solutions to curing any Article 6 equity problems. The Legislative Budget Committee received testimony and evidence from a number of experts, including (1) a Senior Assistant Revisor of Statutes, (2) a Research Analyst from the Legislative Research Department, (3) the Kansas Commissioner of Education, (4) the Deputy Commissioner of Education for Fiscal and Administrative Services, (5) a school district superintendent, (6) the Kansas Association of School Boards' Associate Executive Director for Advocacy, (7) the President of the

Kansas Policy Institute, and (8) a former Speaker of the Kansas House of Representatives with extensive knowledge of Kansas school finance history and policy.

Two critical propositions—supported by virtually all of the experts—emerged from that Legislative Budget Committee hearing. *First*, multiple witnesses testified that a "hold harmless" provision was absolutely necessary as part of any equity cure in order to provide school districts certainty in budgeting for the 2016-2017 school year, the start of which at that time was only about three months away, and now is little more than two months away. App. B. at 69-70 (Dale Dennis, Deputy Commissioner of Education for Fiscal and Administrative Services), *id.* at 121-23 (Dr. Jim Hinson, Superintendent of the Shawnee Mission School District); *id.* at 173-79 (Dr. Randy Watson, Kansas Commissioner of Education); *id.* at 205-06 (Mark Tallman, Kansas Association of School Boards). In other words, the experts' consensus was that any equity cure should not result in reduced overall funding for any school district. Dr. Hinson testified that a hold harmless provision would not create additional inequity:

I don't see any scenario by holding harmless where you create additional inequity, and I'll give you an example: The block grant formula. The block grant formula held harmless school districts that were declining in enrollment. I think it worked really well; it was the right thing to do. And so we have precedent where we've held school districts harmless in that regard, and I think ideally that would occur again at this time. So, no, I do not believe that it would create additional inequity.

*Id.* at 123.

Second, multiple witnesses testified that there was no basis in educational policy for the different formulas for equalizing capital outlay aid and for equalizing LOB aid. The Committee received testimony that of the three "buckets" of equalization aid under the pre-SB 7 financing system—capital outlay, bond and interest (officially known as "capital improvement" aid), and LOB (officially known as "supplemental general state

aid")—one equalization formula applied to both capital outlay aid and bond and interest aid, but an entirely different formula applied to LOB equalization aid. *Id.* at 24, 96. The capital outlay and bond and interest formula in place before July 1, 2015, calculated state aid by multiplying the amount of funds generated from a district's mill levy by a state aid percentage factor. The state aid percentage factor was calculated as follows: (1) start by calculating the median of all districts' AVPP in the previous fiscal year, rounded to the nearest \$1,000; (2) a state aid computation percentage of 25% was then assigned to the median AVPP; (3)(A) for every \$1,000 a district's AVPP was above the median AVPP, its state aid percentage factor was decreased by 1%; (3)(B) for every \$1,000 a district's AVPP was below the median AVPP, its state aid percentage factor was increased by 1%. *Id.* at 22-23; *see also* K.S.A. 2014 Supp. 72-8814; K.S.A. 2014 Supp. 75-2319.

The old, pre-SB 7 formula for LOB equalization aid was very different from the capital outlay formula. The LOB formula provided state equalization aid to districts that had an AVPP under the 81.2 percentile of statewide AVPP (not the median starting point of the capital outlay and bond and interest formula). The amount of LOB equalization aid then was determined as follows: (1) divide the AVPP of the particular district by the AVPP at the 81.2 percentile, (2) subtract the quotient from 1, and (3) multiply by the amount of a district's LOB-generated funds. App. B at 22-23; *see also* K.S.A. 2014 Supp. 72-6434(a).

Not a single witness was able to offer an educational policy justification for the different equalization formulas, nor was any other form of evidence presented to support the difference. Testimony made clear that, in particular, the 81.2% standard used in the old LOB equalization formula had no basis in educational policy. *See*, *e.g.*, App. B. at 76-

77 (Dale Dennis) ("[P]art of it was property tax driven and part of it was they chose, the legislators did, to try to equalize as high as they could go at that time . . . ."); *id.* at 96-97 (Dave Trabert, President of the Kansas Policy Institute) ("I have been told that it was simply a matter of we had this much money we wanted to spend and so we drew the line [at 81.2%], and these are inherently political decisions."); *see also id.* at 136 (Dr. Hinson); *id.* at 213-14 (Mark Tallman).

Given this information and testimony, the Legislature determined that a more sound educational policy would be to use the same formula for both capital outlay and LOB equalization. *See* HB 2655 § 2(c)(2). As a result, following the Legislative Budget Committee hearing, two new bills—HB 2740 and SB 515—were introduced in the Legislature. These bills were identical, and contained several important provisions.

First, both bills restored and fully funded the capital outlay equalization formula as it existed in K.S.A. 2014 Supp. 72-8814, before block-grant funding was implemented in SB 7. Second, the bills applied that same capital outlay equalization formula to LOB equalization. Third, to avoid harming districts that would otherwise see a net loss under these changes, both bills provided for hold harmless aid (or "school district equalization state aid") to districts so that each district will receive for the 2016-2017 school year at least as much funding as it would have received under SB 7. Fourth, the bills transferred administration of the extraordinary need fund created by SB 7 to the State Board of Education (instead of the State Finance Council) and authorized the Board to use the approximately \$15 million in that fund to equalize funding further between districts.

*Finally*, the bills repealed the nonseverability clause from SB 7 and replaced it with an express *severability* clause.<sup>2</sup>

The House Appropriations Committee and the Senate Ways and Means Committee held hearings on HB 2740 and SB 515 over two days—March 22 and 23, 2016. App. B at 263-315 (Senate Ways and Means Committee hearing); *id.* at 316-71 (House Appropriations Committee hearing); *id.* at 457-572 (continued Senate Ways and Means hearing); *id.* at 573-674 (continued House Appropriations hearing).

During these hearings, the committees received detailed and illuminating testimony and mathematical evidence from Eddie Penner, a Research Analyst with the nonpartisan Kansas Legislative Research Department. *Id.* at 458-72, 574-78. Mr. Penner provided the committee with a spreadsheet showing the disparities between the wealthiest and poorest districts over the last few years, in terms of the mills required to generate the non-state portion of a 25% adopted LOB, as well as estimates of these disparities if HB 2740 or SB 515 were to be adopted. *Id.* at 548-49; 652-53. According to this research, during the 2013-14 school year (before the legislative response to this Court's decision in *Gannon I*), the poorest 20% of districts would have been required to levy 15.855 more mills than the wealthiest 20% to raise the non-state portion of a 25% LOB. In 2014-15, after the Legislature responded to *Gannon I*, this disparity shrank

\_

<sup>&</sup>lt;sup>2</sup> HB 2655 § 10 ("K.S.A. 2015 Supp. 72-6481 is hereby amended to read as follows: 72-6481. (a) The provisions of K.S.A. 2015 Supp. 72-6463 through 72-6481, and sections 3 through 5, and amendments thereto, shall not be severable. If any provision of K.S.A. 2015 Supp. 72-6463 through 72-6481, and sections 3 through 5, and amendments thereto, or any application of such provision to any person or circumstance is held to be invalid or unconstitutional by court order, all provisions the invalidity shall not affect other provisions or applications of K.S.A. 2015 Supp. 72-6463 through 72-6481, and sections 3 through 5, and amendments thereto, shall be null and void which can be given effect without the invalid provision or application.").

dramatically to 4.225 mills. In 2015-16, it rose slightly to 5.456 mills under SB 7. *Id.* at 462-64, 576. Mr. Penner testified that if HB 2740 and SB 515 were adopted, the disparity between the wealthiest 20% and the poorest 20% of districts would fall to only 3.148 mills. *Id.* at 461, 465-67, 576. The results are shown below.

Mills Required	to Generate Nor	n-State Portion	of 25% Adopte	d LOB
	2013-14	2014-15	<u>2015-16</u>	2016-17 Est.
Wealthiest 20%	14.659	14.832	13.733	15.510
20%	22.160	20.802	20.673	20.125
Middle 20%	22.879	20.923	19.610	19.734
20%	23.169	18.238	18.213	17.999
Poorest 20%	30.514	19.058	19.190	18.658
Difference Between				
Poorest 20% and				
Wealthiest 20%	15.855	4.225	5.456	3.148

*Id.* at 653. Mr. Penner also explained that if the State Board of Education were to use the extraordinary needs fund for equalization purposes, as HB 2740 and SB 515 explicitly authorize the Board to do, the disparities would shrink even more. *Id.* at 468.

Following Mr. Penner's testimony, proponents, opponents, and a neutral conferee provided testimony on the bills. Despite some other disagreements, both proponents and opponents praised the bills' hold harmless provisions. For instance, Dr. Cynthia Lane, Superintendent of the Kansas City, Kansas, school district—one of the Plaintiff Districts in this lawsuit and an opponent of the overall bill—told the committee: "[W]e want to celebrate the hold harmless piece, we think that's critically important so there aren't consistent winners and losers in the process . . . ." *Id.* at 500; *see also id.* at 558 (written testimony of Dr. Lane) ("I applaud the fact that this bill attempts to 'hold harmless' districts, so that they do not receive less than last year.").

After the hearing on SB 515, the Senate Ways and Means Committee amended the bill to add a preamble and findings of fact to better "show its work" for this Court and to explain the bases for the Legislature's conclusion that the bill satisfies the equity component of Article 6 of the Kansas Constitution. *Id.* at 373-95, 402-03. The four findings were as follows:

- (1) That, based on testimony from the state department of education and other parties involved in the public education system, a hold harmless fund is necessary in light of the fact that many school budgets are set based upon the provisions of the classroom learning assuring student success act [SB 7];
- (2) that the prior equalization formulas used for capital outlay state aid and supplemental general state aid [LOB aid] had no basis in educational policy, and that it is preferable to apply a single equalization formula to both categories of state aid;
- (3) that this act fully complies with the supreme court's order, but that there is an untenable risk the act may be found to be unconstitutional and, as a result, all educational funding could be enjoined. The risk of disrupting education in this regard is unacceptable to the legislature, and as a result, the provisions of this act should be considered as severable; and
- (4) that, based on testimony from the state department of education, the state board of education may be able to more quickly respond to and address concerns raised by the school districts, including, without limitation, emergency needs or a demonstrated inability to have reasonably equal access to substantially similar educational opportunities through similar tax effort.

*Id.* at 403. Committee members carefully examined and discussed these findings in detail before adopting them. *Id.* at 373-96. The Committee then voted to remove the original contents of HB 2655, replace them with the contents of SB 515, and pass Senate Substitute for HB 2655 favorably out of committee. *Id.* at 398-99.

Like the Senate Ways and Means Committee, the House Appropriations Committee, after concluding its hearing on HB 2790, amended the bill to include a

preamble and findings of fact. App. B at 425-31, 448-49. The Committee then voted to remove the original contents of another bill, SB 59, replace them with the contents of HB 2790, and pass House Substitute for SB 59 favorably out of committee. *Id.* at 431-46. Various committee members explained their reasons for voting in favor of or against the bill. *Id.* at 433-42.

On March 24, 2016, the full Senate considered HB 2655, and overwhelmingly approved it on a 32-5 vote (with 3 Senators passing) that same day. *Id.* at 678. Later that day, the House voted 93-31 to concur and sent the bill to the Governor. *Id.* at 728. The House and Senate Journals contain explanations of votes from both proponents and opponents of the bill. *Id.* at 678-701, 728-29, 733-54.

Governor Brownback signed HB 2655 into law on April 6, 2016. In a signing statement, he explained that the bill resolves the equity issue identified in *Gannon II* "by adopting the capital outlay equalization formula previously approved by the court itself." *Id.* at 755. His statement also observed that "the hold harmless language contained in this bill was endorsed by the Kansas Commissioner of Education and the Deputy Commissioner for Fiscal and Administrative Services as being necessary for school district budgeting purposes." *Id.* at 755-56. Noting that the bill was a product of deliberate and well-informed legislative choices, Governor Brownback urged this Court to review the bill with appropriate deference. *Id.* 

#### **ARGUMENT**

HB 2655 cures the Article 6 equity violations this Court previously identified by ensuring that school districts now have reasonably equal access to substantially similar educational opportunity through similar tax effort. HB 2655 accomplishes this "cure" for

capital outlay equalization by restoring and fully funding the previous capital outlay equalization formula, an action which this Court called an "obvious" solution. HB 2655 also cures LOB inequities by applying that same capital outlay equalization formula (previously approved by this Court) to LOB equalization. Finally, the result of HB 2655 according to reliable and uncontroverted data from the non-partisan Kansas Legislative Research Department, will be to reduce wealth-based disparities to a very low level, with the opportunity for the State Board of Education to reduce those small disparities even more by carefully utilizing and dispensing the millions of dollars in the extraordinary need fund created by SB 7.

If for some reason this Court were to conclude that HB 2655 does not fully satisfy the equity aspect of Article 6 of the Kansas Constitution in every respect, despite the Legislature's good-faith efforts and well-supported conclusion to the contrary, the Court nonetheless should hold that HB 2655 is in "substantial compliance" (as the Court did in the *Montoy* litigation ultimately) and uphold HB 2655, which by definition is a one-year interim measure that operates while the Legislature continues to develop a new school funding system. Alternatively, a possibly appropriate judicial remedy would be to sever any unconstitutional provisions without enjoining all education funding. The severability clause in HB 2655 (unlike the non-severability clause in SB 7), readily permits the Court to employ severability if necessary and plainly expresses the intent of the Legislature that the Court do so rather than disabling the entire school-funding law and halting the flow of the vast majority of school funds, which are not at issue in this appeal. There simply is no need nor justification for closing all Kansas public schools as a remedy for any possible Article 6 violation in the circumstances now presented to the Court.

The State respectfully requests the Court to declare that HB 2655 satisfies the equity requirements of Article 6, and then permit the "adequacy" portion of this case to proceed. In the event the Court finds that HB 2655 does not fully satisfy the Article 6 equity requirement, the State requests that the Court use the severability clause in the law to order only such targeted, narrow, and traditional relief as is necessary to remedy any constitutional violation.

# I. HB 2655 Cures Any Capital Outlay Inequities by Restoring and Fully Funding the Previous Capital Outlay Equalization Formula Which This Court Already Has Declared to be Constitutional.

In *Gannon II*, this Court stated: "One obvious way the legislature could comply with Article 6 would be to revive the relevant portions of the previous school funding system and fully fund them within the current block grant system." Slip op. at 73; *see also Gannon I*, 298 Kan. at 1198 (holding that capital outlay inequities will be cured if the Legislature "fully funds the capital outlay provision as contemplated in K.S.A. 2013 Supp. 72-8814").

HB 2655 does exactly that with regard to capital outlay equalization aid. Section 4 of the bill adopts the capital outlay equalization formula as it existed in K.S.A. 2014 Supp. 72-8814 before SB 7, and that formula has been fully funded. *See* HB 2655, §§ 1(b) and 4; App. B at 284. Accordingly, following this Court's own prior words, there is only one inescapable conclusion regarding capital outlay equalization aid under HB 2655: any Article 6 violation has been cured.

- II. HB 2655 Cures Any LOB Inequities by Adopting and Fully Funding for LOB Equalization Aid the Same Formula This Court Previously Approved as Constitutionally Equitable for Capital Outlay Equalization Aid.
  - A. The Legislature had a reasoned and considered basis for altering the old LOB equalization formula.

The Legislature also cured any unconstitutional LOB inequities. The Legislature did so by adopting for LOB equalization purposes the very same equalization formula this Court approved as constitutional for capital outlay equalization aid. The Legislature's careful and considered decision was eminently reasonable and certainly consistent with this Court's admonitions that (1) the unconstitutional inequities "can be cured in a variety of ways—at the choice of the legislature" and (2) the Legislature's "voluntary revival of [the previous equalization formulas] and funding consistent with them is certainly not the only path to compliance." *Gannon II*, slip op. at 73.

During the Joint Legislative Budget Committee hearing, multiple education funding experts testified that the previous equalization formulas—in particular the arbitrary 81.2% standard contained in the old LOB equalization formula—had no basis in educational policy. Nor did (or could) a single witness articulate any rationale for using a different formula for LOB equalization than for the other two categories of equalization, capital outlay aid and bond and interest aid. When asked whether he would favor a single equalization formula for all equalization aid, Shawnee Mission Superintendent Dr. Jim Hinson explained:

In Shawnee Mission we're at eight mills [capital outlay levy], so we're at the ceiling. We don't receive any equalization for capital outlay. We have significant debt in bond and interest. No equalization from the state for bond and interest. But we received equalization for LOB because we fell in that great category of the 81.2. Honestly, I'm not sure how that makes sense. We love the state relief, but does it really make sense. I don't know that that's equitable in the process because the formulas are different.

App. B at 136-37. The Legislature evidently agreed that the prior LOB equalization formula did not make sense, and thus explicitly found "that it is preferable to apply a single equalization formula to both categories of state aid." HB 2655 § 2(c)(2).

Rather than resurrect the old LOB formula, or create an untested new formula, the Legislature instead reasonably and deliberately decided to adopt the equalization formula this Court already has approved as constitutional for capital outlay equalization. It is difficult, if not impossible, to argue with the logic that, if the formula used for capital outlay equalization is constitutional, why would that same formula not also be constitutional for equalizing LOB? Certainly none of the opponents of the bill were able to offer a persuasive reason why Article 6 would require using a different formula for LOB equalization than for capital outlay equalization. Instead, their concerns and objections were focused on total amounts of funding (from all sources), which at most may be an adequacy concern, but is not part of the Article 6 equity inquiry.

B. The Legislature considered precise mathematical evidence which demonstrated that adopting the capital outlay equalization formula for LOB equalization would reduce disparities *more than* retaining the old LOB formula.

Moreover, the Legislature also considered concrete and detailed evidence that applying the capital outlay equalization formula to LOB equalization would satisfy Article 6. Specifically, the Legislature carefully reviewed and considered the following spreadsheet from the non-partisan Kansas Legislative Research Department:

Mills Required	to Generate Nor	n-State Portion	of 25% Adopte	d LOB
	2013-14	2014-15	<u>2015-16</u>	2016-17 Est.
Wealthiest 20%	14.659	14.832	13.733	15.510
20%	22.160	20.802	20.673	20.125
Middle 20%	22.879	20.923	19.610	19.734
20%	23.169	18.238	18.213	17.999
Poorest 20%	30.514	19.058	19.190	18.658
Difference Between				
Poorest 20% and				
Wealthiest 20%	15.855	4.225	5.456	3.148

App. B at 653. This spreadsheet measures the mills a school district in various AVPP quintiles would need to levy to generate the non-state portion of a 25% LOB. Eddie Penner (with the Legislative Research Department), testified that although he used a 25% LOB as an example, "[y]ou could choose to use any percent adopted LOB and the disparity between the numbers would look the same on a percentage basis." *Id.* at 575, 578.

According to this spreadsheet, in 2013-14 (before the legislative response to *Gannon I*), a district in the poorest quintile would have been required to levy 15.855 mills more than a district in the wealthiest quintile to fund the non-state portion of a 25% LOB. But in 2014-15, that disparity fell to only 4.225 mills. Mr. Penner estimated that if the provisions of HB 2740 and SB 515 were enacted (which they were in the form of HB 2655), the disparity would shrink to only 3.148 mills. Importantly, from 2013-14 to 2016-17, the disparity in relative taxing power has declined dramatically from 15.855 mills to 3.148 mills, precisely as a result of the Legislature's efforts to respond in good faith to this Court's *Gannon* decisions.

In fact, the disparity likely will be reduced even further by another provision of HB 2655. Mr. Penner testified that the State Board of Education could reduce the disparity below 3.148 mills by using part or all of the approximately \$15 million in extraordinary need funding to address any remaining equity concerns, a process authorized by HB 2655. See HB 2655 § 9 ("[I]n lieu of any of the forgoing considerations, [the State Board of Education shall consider] whether the applicant school district has reasonably equal access to substantially similar educational opportunity through similar tax effort."). One reason for transferring administration of the extraordinary need fund to the Board of Education, as expressed in the Legislature's findings of fact, was that the Board "may be able to more quickly respond to and address concerns raised by the school districts, including, without limitation, emergency needs or a demonstrated inability to have reasonably equal access to substantially similar educational opportunities through similar tax effort." HB 2655 § 2(c)(4). After all, the Board of Education meets year round and has a full time staff in the Department of Education to assist in distributing equalization aid.

In light of the objective and uncontroverted evidence that applying the capital outlay formula to LOB equalization would reduce wealth-based disparities to the lowest level in recent years, and the State Board of Education's ability to provide up to an additional \$15 million in extraordinary need funding for equalization purposes throughout the coming school year, the Legislature reasonably concluded that HB 2655 cures any Article 6 equity violation with respect to LOB equalization aid. That determination is entitled to substantial deference. *See* Brief of Appellant at 15-17, filed Sept. 2, 2015.

# III. The Hold Harmless Provision Was Supported by All Who Testified About the Bill and Is Both Necessary and Appropriate.

In *Gannon II* and again in its recent Order (dated April 8, 2016), this Court emphasized the importance of minimizing the threat of disruptions to public education funding. *See Gannon II*, slip op. at 72; Order at 2-3. Just like the Court, the Legislature is very concerned about providing budgetary certainty to the districts. Indeed, that was the point of the two-year budgeting adopted in SB 7. To mitigate some of the uncertainty associated with transitioning to the new LOB equalization funding formula under HB 2655, the Legislature included a one-year appropriation of more than \$61 million in hold harmless funding for school year 2016-17. HB 2655 §§ 1(a), 5. The hold harmless appropriation ensures that the amount of equalization aid a school district receives in school year 2016-17 under HB 2655 is no less than the amount it received for school year 2015-2016. *Id.* § 5.

The Legislature specifically found, "based on testimony from the state department of education and other parties involved in the public education system, [that] a hold harmless fund is necessary in light of the fact that many school budgets are set based upon the provisions of the classroom learning assuring student success act [SB 7]." HB 2655 § 2(c)(1). The Governor strongly agreed. App. B at 755-56.

Experts, proponents, and opponents alike all favored and praised the hold harmless provision, including two of the Plaintiff Districts: the Kansas City, Kansas, and Wichita school districts. Deputy Commissioner of Education for Fiscal and Administrative Services Dale Dennis testified that a hold harmless provision is a tool the Legislature logically and commonly has used to smooth the transition to a new funding formula and to avoid an "abrupt change" in property taxes. App. B at 70. Dr. Jim Hinson

(Shawnee Mission District Superintendent) testified that a hold harmless provision is "very important" for providing budgetary certainty for school districts. *Id.* at 121-22. Dr. Cynthia Lane (Kansas City, Kansas, District Superintendent) "celebrate[d]" and "applaud[ed]" the provision, which she described as a "critically important" part of the bill. *Id.* at 500, 558. She explained that the provision will ensure districts "do not receive less than last year" and that the Legislature has used such provisions "during a change in the school funding formula . . . for the past 20 years." *Id.* at 558. Jim Freeman, the Chief Financial Officer of Wichita Public Schools, testified that he "appreciate[s] efforts to hold districts harmless." *Id.* at 560.

Importantly, the hold harmless appropriation also provides school districts substantial flexibility in how the funds can be used. Responding to concerns that equalization funds could be used only to reduce property taxes, *see* App. B at 340, the Legislature specified that hold-harmless funds "shall [be] credit[ed] . . . to the general fund of the school district to be used for the purposes of such fund." HB 2655 § 5(c). This allows each school district to decide for itself—based on local needs, concerns, and considerations—how to spend the money. *See* App. B at 344-45.

Further, there is no basis in the legislative record to support any argument that the provision will "benefit[] wealthier school districts at the expense of poorer districts." App. B at 680, 733. To the contrary, as discussed and demonstrated above, the HB 2655 funding formula for LOB equalization reduces the disparity between the wealthiest 20% and the poorest 20% of school districts to the lowest level in years. Moreover, any relatively minor inequity that may result from school districts' actions in response to HB 2655 can be mitigated by the State Board of Education which now has the authority

to award some or all of the \$15 million extraordinary need fund to ensure equalization. *See* HB 2655 § 1, 9; App. B. at 270, 383-384, 468.

The hold harmless provision is a critical component of HB 2655. Proponents and opponents of the bill, as well as neutral experts, uniformly supported the provision, and HB 2655 likely would not have been enacted without that provision. Critically, the provision ensures stability and predictability (as well as provides improved spending flexibility) in school district budgets, budgets which for the most part already have been set for the rapidly approaching 2016-17 school year (less than two months away by the time this Court hears oral argument on the equity cure).

IV. HB 2655, At a Minimum, Substantially Complies with This Court's Gannon I & II Directives. If This Court Nonetheless Determines that a Remedy Is Required, the Correct Remedy Would Be to Sever Any Unconstitutional Provisions in the Most Narrow and Targeted Way Necessary to Eliminate the Constitutional Violation. Ordering that Kansas Schools Be Shut Down Is Neither a Necessary Nor a Judicially Proper Remedy.

In *Gannon II*, this Court warned that it might order all Kansas schools closed on June 30, 2016, unless the Legislature complies with the equity requirement of Article 6 by enacting an education funding formula that gives school districts reasonably equal access to substantially similar educational opportunity through similar tax effort. *See Gannon II*, slip op. at 74. The Court repeated this warning in its recent Order, dated April 8, 2016. Order at 3. By enacting HB 2655, the Legislature has promptly and in good faith cured the inequities this Court identified in *Gannon II*. The Legislature has no wish to see the schools close; rather, it strongly desires to have Kansas schools open for the start of the 2016-17 school year. The Legislature's intent in this respect is explicit and irrefutable. HB 2655 § 2(c)(3) ("The risk of disrupting education in this regard is

unacceptable to the legislature, and as a result, the provisions of this act should be considered as severable.").

If the Court were to find the Legislature's cure not completely sufficient in some respect, the Court nonetheless should find that HB 2655 substantially complies with this Court's *Gannon* decisions. *Cf. Montoy v. State*, 282 Kan. 9, 24-25, 138 P.3d 755 (2006) (finding substantial compliance with the Court's prior orders). Given that HB 2655 necessarily is intended to be only a short-term solution, coupled with the uncontroverted and indisputable evidence that HB 2655 substantially reduces the wealth-based disparities the Court identified in *Gannon I*, a sensible and appropriate judicial action would be to permit HB 2655 to go into effect while the Legislature writes a new, permanent school finance formula. *See* Brief of Appellant at 42-46 (filed September 2, 2015).

Ordering the Legislature to return to the old LOB equalization formula would raise serious separation of powers concerns this Court wisely and properly has avoided in the past. Such a remedy also would have the undisputed effect of reducing funding for numerous school districts just as the 2016-17 school year is about to begin, a counterproductive (and ironic at best) result given the requirements of Article 6 and the shared goal of providing funding for public education in Kansas.

Alternatively, if the Court declines to follow the substantial compliance approach, the Court should at most order a remedy that in a targeted fashion severs only any offending provision(s) of HB 2655, rather than the extreme, disruptive, unprecedented, and utterly unnecessary remedy of effectively ordering the closure of Kansas schools because the Court has invalidated the entire Kansas school funding system. Any order

severing part of the law should take effect July 1, 2016, when the law itself (including its severability clause) is scheduled to become effective. *See* HB 2655 § 13.

In an equitable relief setting, this Court has "inherent power to enforce [its] holdings," *Gannon II*, slip op. at 67, but "even where equity jurisdiction exists, it generally is recognized that the equitable remedial powers of the court are not unlimited," *Rice v. Garrison*, 258 Kan. 142, 151, 898 P.2d 631, 637 (1995) (internal quotation marks omitted). Striking down the entire funding formula—and thus forcing the schools to close—ironically and necessarily would result in this Court itself causing an unprecedented violation of the adequacy requirement of Article 6. Zero funding for Kansas public schools cannot comply with Article 6, and the only reason zero funding would exist would be as a result of this Court's orders and decisions. A Court ordered remedy that itself violates the Kansas Constitution is not part of the equitable powers of this Court, or the Court's powers under Article 3 of the Kansas Constitution. Moreover, if Kansas schools were defunded and shuttered by court order, serious issues of compliance with various federal educational and funding requirements would arise.

Any equitable remedy must be "limited 'to remedies required by the nature and scope of the violation.'" *Essex v. Kobach*, 874 F. Supp. 2d 1069, 1084 (D. Kan. 2012) (quoting *White v. Weiser*, 412 U.S. 783, 793 (1973)). Here, the severability clause requires the Court, if it finds any inequities exist, to limit its relief to severing the unconstitutional provision(s) rather than taking the legally unnecessary and unprecedented step of depriving Kansas public schools of all funding for 2016-17.

In any event, the Court should not consider (and lacks the constitutional authority to order) any remedy—including the Panel's attempted remedy—that would direct the

Legislature to amend or repeal statutes, or to appropriate particular funds. Any such remedy would be a clear usurpation of constitutionally granted legislative authority, and necessarily would violate the separation of powers. See Brief of Appellant at 39-42, filed Sept. 2, 2015; Response Brief of Appellant State of Kansas at 25-29, filed Oct. 2, 2015.

# **CONCLUSION**

The Legislature's good faith, deliberate, and carefully considered determination that HB 2655 cures the Article 6 equity violations previously identified by this Court is amply supported by the legislative record, which includes the testimony of experts, objective studies and analyses, and thoughtful deliberations. The Legislature's solution also is supported by reason and logic. This Court should defer to the Legislature's determinations embodied in HB 2655 and dismiss the Plaintiffs' Article 6 equity claim.

Respectfully submitted,

# APPENDIX L: Quintile Data from Kansas Legislative Research Department (With Supporting Documentation)

The State would have you believe that the following hypothetical chart proves that *adopting the capital outlay formula for LOB equalization* causes a reduction in mill level disparities:

Mills Required	to Generate Nor	n-State Portion	of 25% Adopte	d LOB
	2013-14	2014-15	<u>2015-16</u>	2016-17 Est.
Wealthiest 20%	14.659	14.832	13.733	15.510
20%	22.160	20.802	20.673	20.125
Middle 20%	22.879	20.923	19.610	19.734
20%	23.169	18.238	18.213	17.999
Poorest 20%	30.514	19.058	19.190	18.658
Difference Between				
Poorest 20% and				
Wealthiest 20%	15.855	4.225	5.456	3.148

There are flaws in this method. The comparison made is for a 25% LOB, but very few districts have had an LOB that low in recent years. The disparity will be higher at more realistic amounts of LOB. This also is a comparison of *averages* and does not look at the disparities between individual districts. We attach the individual district numbers from which he took his quintiles.

In reality, all the State has done is remove equalization aid, rename it, and give it back to districts in the same amounts. The net dollar change in state aid to almost all districts is zero. Thus the renaming of state aid dollars CANNOT have an effect on mill levies. (Except for increasing them due to the ability that some districts have to backfill the cut in their LOB equalization, discussed elsewhere.)

So what else could have affected mill levies? Assessed valuation fluctuates from year to year, and while it has been generally increasing, it varies per district, and this year many of the wealthier districts became less wealthy. This alone caused a decrease in the disparity between districts. If we compare the AVPP in the same way as the State compared mills required for LOB, we get this similar chart:

As	Assessed Valuation Per Pupil Changes											
	<u>2012-13</u> *	<u>2013-14</u> *	<u>2014-15</u> *	2015-16 Est.*								
Wealthiest 20%	192,667	193,888	211,301	182,851								
20%	87,874	93,462	96,825	100,167								
Middle 20%	64,217	66,871	69,954	74,016								
20%	50,218	51,811	52,765	55,581								
Poorest 20%	36,215	36,554	37,283	39,134								
Difference Between												
Poorest 20% and	156,452	157,334	174,018	143,717								
Wealthiest 20%	*KLRD	used prior year Ass	sessed Valuation	in their calculations.								

Comparing this chart to the required mills, you can see that for 2015-16 there is a decrease to the average AVPP of the wealthiest districts, and this causes a 1.777 mill increase to fund the same dollars for 2016-17. No aid was taken away from the wealthiest districts. Thus this increase was solely a result of the change in AVPP decreasing their purchasing power and therefore requiring more mills to fund the same dollars.

On the other end of the spectrum, the poorest districts gained in average AVPP. This caused an increase in purchasing power, requiring less mills to fund the same dollars.

The reduced disparity shown in the State's hypothetical chart has nothing to do with the renaming of state aid dollars and can be fully explained by natural changes in assessed valuation from year to year.

#### Sharon-

Eddie Penner in your office did some calculations and testified on what became HB2655. His charts were included in the transcribed testimony and the state's brief but not the underlying spreadsheets or calculations. Can you get me the spreadsheets he used to make the charts? We would like the data on the district level. I have a time crunch on this as our brief is due on Monday. Can you help me out?

# APPENDIX N: Rearranging the Legos

# Rearranging the Legos How do the Block Grant and HB2655 stack up for individual districts?

Return to Old Formulas

- School District Equalization (Hold Harmless) State Aid
- Capital Outlay State Aid
- Supplemental General (LOB) State Aid

#### Arranging the Legos.... How do the "block grant" and "HB2655" stack up?

- 1. First we have the block grant.
  - a. We have Yellow blocks representing LOB equalization.
  - b. We have a Green block representing capital outlay equalization.
  - c. Both of these stacks were found to be unconstitutional.
- 2. What did HB 2655 do?
  - a. It took away from the Yellow blocks for LOB.
  - b. It added to the Green blocks for capital outlay.
  - c. To avoid any losses, it created hold harmless aid with the Red blocks.
- 3. How do these stack up?
  - a. The block grant stack and the HB 2655 stack are identical.
  - b. They simply renamed the money.
  - c. No one gained or lost (outside of some outliers.)
  - d. It redistributed nothing.
  - e. It did not change the relationship of poor to wealthy districts.
- 4. What was the safe harbor articulated by the Court?
  - a. The safe harbor is fully funding the old formulas.
  - b. The court did not require this, but we know this IS constitutional.
  - c. There are more Yellow blocks, for LOB aid, not less.
  - d. There are more Green blocks, for capital outlay aid.
- 5. How do the block grant stack and the HB2655 stack compare to the safe harbor?
  - a. The block grant stack and the HB2655 stack still fall short.
