\* This provision applies to pupils that would qualify for paid or reduced priced lunches, and did not meet proficient in Math or Reading State Assessments in the prior year. The virtual school must have a virtual at-risk pupil assistance plan on file with KSDE.

\*\* The Advanced Placement (AP) course is not available in the home district of the virtual pupil. The home district is either more than 200 square miles or has an enrollment of at least 260 pupils.

"Virtual School" means any school or educational program that: (1) is offered for credit; (2) uses distance-learning technologies which predominately use internet-based methods to deliver instruction; (3) involves instruction that occurs asynchronously with the teacher and pupil in separate locations; (4) requires the pupil to make academic progress toward the next grade level and matriculation from kindergarten through high school graduation; (5) requires the pupil to demonstrate competence in subject matter for each class or subject in which the pupil is enrolled as part of the virtual school; and (6) requires age-appropriate pupils to complete state assessment tests.

**ADDITIONAL DEFINITION FOR SCHOOL FACILITIES (Must use a minimum LOB listed below to qualify for this provision.)**

a) School Facilities Definition - School facilities weighting is available for school districts whose adopted local option budget (LOB) is at least 25% for 2011-12 and have constructed an entirely new facility or an addition to an existing facility.

The determination of weighting will be based upon the number of full-time equivalent (FTE) students that are enrolled and attending in the new facility September 20 (and February 20 for districts qualifying under K.S.A. 72-6448). In the case of school districts that have constructed an addition to existing facilities, the number of students that are enrolled and attending in the new addition will be counted on a full-time equivalent basis (see example 2.) The additional weighting for this provision of the law is applicable for two years only. For a new facility, the FTE is for the entire building (see example 1). For additions to an existing facility, the following calculating would be utilized.

**Example #1: (For new buildings.)**

For a totally new constructed building, the FTE equals the total enrollment FTE for that building.

	<u>Headcount</u>	<u>FTE</u>
Kindergarten	77	38.5
Grade 1	87	87.0
Grade 2	81	81.0
Grade 3	75	75.0
Weighting for example:		281.5 X 0.25 = 70.4 X \$3780 = \$266112

**Example #2: (For new additions)**

Total number of students in each new classroom \_\_\_\_\_  
 Number of class periods (divide by) \_\_\_\_\_  
 Full-time equivalent enrollment = \_\_\_\_\_

Example:	New classroom A =	105	students for the day
	New classroom B =	154	students for the day
	New classroom C =	133	students for the day
	New classroom D =	121	students for the day
	TOTAL =	513	
	divide by	7	class periods
	=	73.3	FTE

Weighting for above example: 73.3 X 0.25 = 18.3 X \$3780 = \$69174

**Qualifying for New Facilities Weighting**

In order to qualify for new facilities weighting, a district must have adopted at least a 25% local option budget.
